Proceedings of the ... Annual Meeting National Association of Secondary School Principals (U.S.), 1928 Delivering Entrepreneurship Education in Africa Chux Gervase Iwu, Richard Shambare, 2023-12-14 Delivering Entrepreneurship Education in Africa brings together a collection of academic studies that offer an in depth analysis of the current state of entrepreneurship education in Africa The chapter authors engage discussions on how to make entrepreneurship education an attractive field of study for African students **Handbook of Positive Psychology** C. R. Snyder, Shane J. Lopez, 2001-12-20 Psychology has long been enamored of the dark side of human existence rarely exploring a more positive view of the mind What has psychology contributed for example to our understanding of the various human virtues Regrettably not much The last decade however has witnessed a growing movement to abandon the exclusive focus on the negative Psychologists from

several subdisciplines are now asking an intriguing question What strengths does a person employ to deal effectively with life The Handbook of Positive Psychology provides a forum for a more positive view of the human condition In its pages readers are treated to an analysis of what the foremost experts believe to be the fundamental strengths of humankind Both seasoned professionals and students just entering the field are eager to grasp the power and vitality of the human spirit as it faces a multitude of life challenges The Handbook is the first systematic attempt to bring together leading scholars to give voice to the emerging field of positive psychology

Discourses We Live By: Narratives of Educational and Social Endeavour Hazel R. Wright, Marianne Høyen, 2020-07-03 What are the influences that govern how people view their worlds What are the embedded values and practices that underpin the ways people think and act Discourses We Live By approaches these questions through narrative research in a process that uses words images activities or artefacts to ask people either individually or collectively within social groupings to examine discuss portray or otherwise make public their place in the world their sense of belonging to and identity within the physical and cultural space they inhabit This book is a rich and multifaceted collection of twenty eight chapters that use varied lenses to examine the discourses that shape people's lives The contributors are themselves from many backgrounds different academic disciplines within the humanities and social sciences diverse professional practices and a range of countries and cultures They represent a broad spectrum of age status and outlook and variously apply their research methods but share a common interest in people their lives thoughts and actions Gathering such eclectic experiences as those of student teachers in Kenya a released prisoner in Denmark academics in Colombia a group of migrants learning English and gambling addiction support workers in Italy alongside more mainstream educational themes the book presents a fascinating array of insights Discourses We Live By will be essential reading for adult educators and practitioners those involved with educational and professional practice narrative researchers and many sociologists It will appeal to all who want to know how narratives shape the way we live and the way we talk about our lives

Drum, 2009 *The long and short of mental time travel-- self-projection over time-scales large and small* James M. Broadway, Claire M. Zedelius, Jonathan W. Schooler, Simon Grondin, 2015-07-02 Researchers working in many fields of psychology and neuroscience are interested in the temporal structure of experience as well as the experience of time at scales of a few milliseconds up to a few seconds as well as days months years and beyond This Research Topic supposes that broadly speaking the field of time psychology can be organized by distinguishing between perceptual and conceptual time scales Dealing with conceptual time mental time travel also called mental simulation self projection episodic semantic memory propection foresight allows humans and perhaps other animals to imagine and plan events and experiences in their personal futures based in large part on memories of their personal pasts as well as general knowledge Moreover contents of human language and thought are fundamentally organized by a temporal dimension enmeshed with it so thoroughly that it is usually expressible only through spatial metaphors But what might such notions have to do with experienced durations of

events lasting milliseconds up to a few seconds during the so called present moment of perception action cycle time This Research Topic is organized around the general premise that by considering how mental time travel might scale down to time perception and vice versa no less progress and integrative synthesis within and across scientific domains might be facilitated Bipolar configurations of future and past orientations of the self may be repeated in parallel across conceptual and perceptual time scales subsumed by a general Janus like feedforward feedback system for goal pursuit As an example it is notable that the duality of prospection and semantic episodic memory operating at conceptual time scales has an analogue in perception action cycle time namely the interplay of anticipatory attention and working memory Authors from all areas of psychology and neuroscience are encouraged to submit articles of any format accepted by the journal Original Research Methods Hypothesis Theory Reviews etc which might speak to questions about time and temporal phenomena at long and or short time scales
