PERIODIC CHECKUP

After 20 hours, an inspection should be performed by an Authorized Outboard Dealer at local rates and paid for by the owner.

After the 20-hour check, your outboard should be taken to an Authorized Dealer every 100 hours of operation - or at least once each year - for lube change, tuneup, etc.

To find the Authorized Service facilities in your locality, or when traveling, refer to the classified or yellow pages in the local telephone directory under "Outboard Motors" or "Marine Engines."

This owner's publication includes operation and service instructions. If disassembly or replace-

ment, particularly of internal parts, is required, the owner is advised to see an Authorized Service Dealer and not to attempt the repair work himself.

Mercury Loadrunner Manual

Robert W. Buchanan

Mercury Loadrunner Manual:

Cost Accounting for Shared IT Infrastructures Reinhard Brandl, 2008-08-21 During the past few years determining the value of IT has ranked high on the agenda of IT managers and Chief Information Officers CIOs The rather broad and abstract topic has been intensively discussed in the Information Systems literature for many years It turns into a very tangible problem in the field of IT cost accounting Nowadays corporate information systems are distributed systems A detailed measurement of resource demands of IT services on a distributed IT infrastructure and respective accounting and cost allocation turns out to be very expensive and impractical in most cases The large proportion of indirect costs and the difficulty of finding adequate allocation rates are a significant problem in practice regularly leading to free rider problems This problem has largely been ignored in the academic literature so far Dr Brandl proposes a method to derive estimators for the resource demand of service requests in a distributed IT infrastructure This estimator is based on a set of load tests and respective measurements as they are often performed during the deployment phase of new information systems Cost allocation keys can now be determined based on the number of service invocations per user or per department and the respective estimators While these measurements provide a lean method for the determination of usage based cost allocation keys it is not obvious that the estimators have sufficient accuracy in particular concerning different types of services and volatile workloads

Professional Silverlight 2 for ASP.NET Developers Jonathan Swift, Salvador Alvarez Patuel, Chris Barker, Dan Wahlin, 2009-04-15 Our overarching goal in writing this book was to give ASP NET developers the power to quickly and easily create visually stunning Internet applications coupled with rich interactivity to fully immerse the user in a new online experience Silverlight gives you everything you need to do just this and in serious style As well as taking you through each feature that ships with Silverlight this book will make sure you re able to debug troubleshoot and performance tune your Silverlight applications as well as seamlessly hook into your existing ASP NET architecture and code base This book is aimed at NET developers and architects who want to quickly get up to speed with all that Silverlight 2 has to offer As well as covering the breadth of features that Silverlight 2 provides this book makes a point of demonstrating where necessary how the particular feature can be integrated tightly with the ASP NET host application An example is in Chapter 7 where the

ASP.NET Profile service is utilized directly from within Silverlight to obtain user specific data. It's fair to say that although this book is aimed at ASP.NET developers it covers all of the salient features of Silverlight 2 to the degree that it's a useful programming resource for developers not using ASP.NET also. If you're fresh to .NET development however you might want to check out a beginning .NET book first to help you overcome the syntax and set up queries when learning a new language. Otherwise take a deep breath and dive in. This book covers the full feature set of Silverlight 2 diving into each of the subject areas to give depth and breadth coverage. As well as teaching you about the component parts of the Silverlight API the book also covers debugging, troubleshooting and performance tuning your Silverlight applications arming you with all the skills and knowledge you'll need to create advanced Silverlight based applications in record time. Importantly this book covers the integration points between ASP.NET and Silverlight taking you through the different techniques you can use to seamlessly augment your existing or new ASP.NET web sites with the power of Silverlight. If you want to program in Silverlight and potentially use ASP.NET as the host then this book covers it all. The book is split into two distinct parts. Part I is titled Silverlight Fundamentals for ASP.NET Developers and Part II is titled Developing ASP.NET Applications with Silverlight. Part I is intended to give you grounding in what Silverlight is as a technology and how it fits into the Web based landscape. The component pieces of a Silverlight application are also laid out at a high level and any knowledge required before putting an application together is explained. Part II is written to give you depth of knowledge across the Silverlight feature set and show you how to leverage the power of both Silverlight and ASP.NET to create compelling applications. A brief synopsis of the content follows.

Silverlight in a Nutshell This will teach you at a high level what Silverlight is and how it can help you deliver engaging immersive web applications. Differentiating Silverlight from other Web based technologies is also covered here and a description of the required development environment is provided. In short after reading this you'll be able to describe Silverlight and explain why you'd want to use it and what gives it the edge over the competition.

Silverlight Architecture Silverlight allows you to rapidly build a well rounded application with a great user interface but if you encounter any problems during development it is going to be important for you to understand.
