Sites is geared toward environmental professionals who want to design and implement gasworks remediation strategies that offer the greatest chance to successfully protect the public Exploring the bases for selecting remedial alternatives to

remediation Almost encyclopedic in scope it offers 265 separate tables with checklists hard data facts and associations to

help readers define site specific gas plant conditions It also includes a plethora of photographs and historic drawings as well

as an extensive glossary that is indispensable for understanding potential and actual gas plant contamination Useful for engineers scientists regulators public officials historians and journalists among others this book is intended for those who conduct remediation as well as those involved in review and oversight Its goal is to bring users closer to safely reclaiming land and reviving old coal gasworks sites in ways that ultimately will be sustainable for the public interest *LA Record*,2001 **Government Reports Announcements & Index** ,1995-10 Aeronautical Engineering: A Cumulative Index to a Continuing Bibliography (supplement 325) ,1995 **Catalogue of Title-entries of Books and Other Articles Entered in the Office of the Librarian of Congress, at Washington, Under the Copyright Law ...
