Vandenengel,2023-11-15 Winner of The Navy League s 2024 Alfred Thayer Mahan Award for Literary Achievement The nuclear powered aircraft carrier is naval history s most powerful and versatile warship It is the reason the U S Navy is the predominant force at sea today Throughout its illustrious history the carrier has overcome serious flaws including its expense vulnerability centralization of combat power and its airwing s short range The U S Navy always accepted those flaws because the carrier was the best means of delivering firepower Today s technologies however provide key opportunities for the U S Navy to move beyond the limitations of a carrier centric fleet by redesigning its force structure **Questioning the Carrier** examines how the U S Navy can embrace the Age of the Missile network the distributed fleet and diversify to develop a fleet that benefits from the aircraft carrier s many strengths without being wholly dependent on them By acting on those opportunities the U S Navy can develop a structure that performs the carrier centric fleet s functions more effectively using a force consisting of more platforms with less total risk and within the same long term budget As adversaries are improving their ability to deter the carrier thus causing its utility to wane the author examines the Navy s past successes to show how it can overcome institutional resistance to change and continue to rule the seas *US Navy Cold War Guided Missile Cruisers*

Mark Stille,2020-02-20 Faced with an increasingly formidable anti ship cruise missile threat from the Soviet Union in the early days of the Cold War and with the recent memory of the kamikaze threat from World War II the USN placed a great priority on developing air defence cruise missiles and getting them to sea to protect the fleet The first of these missiles were sizable necessitating large ships to carry them and their sensors which resulted in the conversion of a mix of heavy and light cruisers These ships tasked with protecting carrier groups and acting as flagships entered service from 1955 and served until

1980 The cruisers served in the front lines of the Cold War and many saw combat service engaging in surface actions from Vietnam to the Persian Gulf Complementing the conventionally powered missile cruisers was a much smaller number of expensive nuclear powered cruisers including the Long Beach the USN's largest ever missile cruiser Until replaced by the Ticonderoga and Burke classes of Aegis ships the USN's 38 missile cruisers were the most capable and important surface combatants in the fleet and served all over the globe during the Cold War Using specially commissioned artwork and meticulous research this illustrated title explores the story of these cruisers in unparalleled detail revealing the history behind their development and employment      **The Naval Institute Guide to Combat Fleets of the World, 2005-2006**

*Proceedings* ,2004      **Principles of Naval Weapon Systems** Craig M. Payne,2010 This textbook is intended to serve as an introduction to the underlying science and engineering of weapons used in the naval service The philosophy used in the material selected for this text is that individual weapons come and go but the principles of their operation largely remain the same Some subjects are covered in greater detail than needed for an introductory course to allow this text to serve as a basic reference to take into professional life The text was written to be inclusive of all college majors as such a conscious effort was made when possible to apply algebra geometry trigonometry and avoid calculus Therefore many of the equations derived are 1st order and provide approximations that are sufficient to illustrate the relative performance parameters of variables used in weapon system design These same theories and principles can then be applied to actual sensors and weapons using operational parameters and specifications determined from technical manuals and warfare publications Material has been drawn from pervious texts of the same title that have explained the principles for the last 40 years Much of the work can be traced to the work completed by the Bureau of Naval Weapons in the 1960 s It was updated and expanded in the 1980 s version and incorporated in this text In some cases principles of systems that the U S Navy no longer uses are described in a belief that sometimes it is good to know where you have been to know where you are going In addition many countries and organizations still employ some of these lower technology systems Therefore it is necessary to understand their basic capabilities With advent of new technologies and methods this text will require periodic updating      *Naval War College Review* ,2015      *Magill's Guide to Military History: Jap-Pel* John Powell,2001 Salem Press s five volume Magill s Guide to Military History presents a survey of the wars battles peoples groups and civilizations that played an important role in worldwide military history from ancient times to the twenty first century In addition to comprehensive coverage of Western military history the encyclopedia examines the major military events personages and civilizations of the entire world from the beginning of military history Includes Time Line of Wars and Battles Wars and Battles by Geographical Area Military Leaders by Geographic Area and List of Entries by Category      **New Serial Titles** ,1995 A union list of serials commencing publication after Dec 31 1949
