Dramatising Disaster Christine Cornea, Rhys Owain Thomas, 2013-02-14 The imagining of disaster has intensified across a wide range of media entertainment formats and genres in recent years and themes of disaster are regularly deployed in fictional films television drama series drama documentaries comic books and video games This being the case it is therefore vital that film and media scholars pay attention to the ways in which disaster is presented to us to the figurative strategies employed to the representational history of disaster in media to the metaphorical resonances of disaster themes and even to the ways in which entertainment media texts might be understood as part of a broader discourse of disaster within certain historical and cultural contexts Dramatising Disaster presents new and innovative research from both early career and more established academics Some of the chapters in this edited collection are based upon papers originally presented at a highly successful conference study day held by the School of Film Television and Media at the University of East Anglia in 2011 while others are specifically solicited contributions Distinct from previous more particularised film and media studies in this area this edited collection is focused not upon a specific disaster or specific disaster context but upon the wider topic of disaster in popular culture *Life After Survival* Patricia A. Mansmann, Patricia A. Neuhausel, 1989-04

A Land Before Humans, a Land After Humans Mark Fisher, 2025-02-28 Some species survive reliant on conservation some may survive eluding our knowing some may not survive despite our efforts and some may survive by adapting to and integrating with human worlds New Zealand is a unique and fascinating country as a case study for managing invasive species Because of its history we know a lot about species introductions and because of its geographical position as a

relatively small remote island the potential for dealing with invasive species may be more effective than elsewhere Moreover the fragility of its ecosystems makes it relatively easy to see the impact of one species upon another Nature and people shape the country's ecology from its geological and biological beginnings to the relatively recent arrival of people and the changes wrought to the wide ranging efforts of individuals and communities to protect and enhance treasured species and environments Among them an ambitious Predator Free 2050 initiative to rid the country of some of its unwanted species The issue is a complex and interesting one There are ethical considerations which species are protected and which destroyed How are they destroyed What are the unforeseen consequences There are also tensions between preservation and the use of natural resources and ultimately our relationship to the environment how we live A Land Before Humans a Land After Humans explores these issues An invaluable resource for environment ecology animal welfare and ethics students researchers and policy makers the book takes New Zealand as a case study and looks at the practical and ethical considerations of dealing with invasive species 5m Books Unbreaking
