*Freedom from Religion and Human Rights Law* Marika McAdam, 2017-11-14 Although human rights belong to all persons on the basis of their humanity this book demonstrates that in the practice of international human rights law the freedom to be non religious or atheist does not receive the same protection as the freedom to be religious Despite the claimed universality of freedom of religion and belief contained in article 18 of the International Covenant on Civil and Political Rights the key assertion made is that there is a hierarchy of religion and belief with followers of major established religions enjoying high protection and low regulation at the top and atheists and non believers enduring high persecution and weaker protection at the bottom The existence of this hierarchy is proven and critiqued through three case study chapters that respectively explore the extent to which non religious and atheist rights holders enjoy freedom from proselytism freedom from hate and freedom from the religions of their parents

Calling the Shots Daniel P. Gitterman, 2017-02-14 Modern presidents are CEOs with broad powers over the federal government The United States Constitution lays out three hypothetically equal branches of government the executive the legislative and the judicial but over the years the president as head of the executive branch has emerged as the usually dominant political and administrative force at the federal level In fact Daniel Gitterman tells us the president is effectively the CEO of an enormous federal bureaucracy Using the unique legal authority delegated by thousands of laws the ability to issue executive orders and the capacity to shape how federal agencies write and enforce rules the president calls the shots as to how the government is run on a daily basis Modern presidents have for example used the power of the purchaser to require federal contractors to pay a minimum wage and to prohibit contracting with companies and contractors that knowingly employ unauthorized alien workers Presidents and their staffs use specific tools including executive orders and memoranda to agency heads as instruments of control and influence over the government and the private sector For more than a century they have used these tools without violating the separation of powers Calling the Shots demonstrates how each of these executive powers is a powerful weapon of coercion and redistribution in the president s political and policymaking arsenal
