Memorandum Of 2014 Paper Geography November:

Origination Andy Pike, 2015-03-24 **Origination** The Geographies of Brands and Branding offers innovative theoretical and conceptual frameworks relating to the ways that actors create meaning and value in commodity brands and branding through processes of geographical association Provides innovative conceptualization and theorization to facilitate an understanding of the geographical dimensions of brands and branding Challenges current interpretations of brands as vehicles of homogenization in globalization Establishes the theoretical and conceptual foundations of a more geographically sensitive approach through rigorous empirical examination of the under researched geographical differentiation of commodity brands and branding Presents innovative new research and analysis of the socio spatial biographies of the Newcastle Brown Ale Burberry and Apple brands Forges strong new connections between political and cultural economy approaches within geography Provides a distinctive and incisive conceptual and theoretical framework capable of engaging other branded commodities and their branding in other times and places Deepening Neoliberalism, Austerity, and Crisis Julien Mercille, Enda Murphy, 2015-07-07 From bank bailouts to austerity Europe's and Ireland's response to the economic crisis has been engineered specifically to shift the burden of paying for the crisis onto ordinary citizens while investors financiers bankers and the privileged are protected The authors expose the class based nature of Ireland's crisis resolution

Healthy, Resilient, and Sustainable Communities After Disasters Institute of Medicine, Board on Health Sciences Policy, Committee on Post-Disaster Recovery of a Community's Public Health, Medical, and Social Services, 2015-09-10 In the devastation that follows a major disaster there is a need for multiple sectors to unite and devote new resources to support the rebuilding of infrastructure the provision of health and social services the restoration of care delivery systems and other critical recovery needs In some cases billions of dollars from public private and charitable sources are invested to help communities recover National rhetoric often characterizes these efforts as a return to normal But for many American communities pre disaster conditions are far from optimal Large segments of the U S population suffer from preventable health problems experience inequitable access to services and rely on overburdened health systems A return to pre event conditions in such cases may be short sighted given the high costs both economic and social of poor health Instead it is important to understand that the disaster recovery process offers a series of unique and valuable opportunities to improve on the status quo Capitalizing on these opportunities can advance the long term health resilience and sustainability of communities thereby better preparing them for future challenges **Healthy Resilient and Sustainable Communities After Disasters** identifies and recommends recovery practices and novel programs most likely to impact overall community public health and contribute to resiliency for future incidents This book makes the case that disaster recovery should be guided by a healthy community vision where health considerations are integrated into all aspects of recovery planning before and after a disaster and funding streams are leveraged in a coordinated manner and applied to health improvement priorities in order to

meet human recovery needs and create healthy built and natural environments The conceptual framework presented in Healthy Resilient and Sustainable Communities After Disasters lays the groundwork to achieve this goal and provides operational guidance for multiple sectors involved in community planning and disaster recovery Healthy Resilient and Sustainable Communities After Disasters calls for actions at multiple levels to facilitate recovery strategies that optimize community health With a shared healthy community vision strategic planning that prioritizes health and coordinated implementation disaster recovery can result in a communities that are healthier more livable places for current and future generations to grow and thrive communities that are better prepared for future adversities

Arctic Shipping Frédéric Lasserre, Olivier Faury, 2019-09-05 This book considers both the present state of Arctic shipping and possible future trends with reference to the various sectors of maritime transportation cruise tourism container traffic and bulk shipping Ports are analysed as tools that support the strategies of coastal states to foster the development of resource extraction enhance the attractiveness of Arctic shipping lanes and enable the control of maritime activities through coast guard deployment The aim of this book is to draw a picture of the trends of Arctic shipping How is traffic evolving in Canada s Arctic or along the Northern Sea Route Are there significant differences between bulk and container shipping segments when considering the Arctic market How are the ports and the hinterland developing and what are the strategies behind those How is the legal framework shaping the evolution of maritime transportation The contributors to this book consider all of these questions and more as they map out the prospects for Arctic shipping and analyse in detail the development of Arctic shipping as a result of multi variable interactions This book will be key reading for industry professionals and post graduate students alike

The Economics of the Global Defence Industry Keith Hartley, Jean Belin, 2019-11-08 This book makes an original contribution to

our knowledge of the world's major defence industries. Experts from a wide range of different countries from the major economies of North America and Western Europe to developing economies and some unique cases such as China, India, Singapore, South Africa and North Korea describe and analyse the structure, conduct and performance of the defence industry in that country. Each chapter opens with statistics on a key nation's defence spending, its spending on defence R D and on procurement over the period 1980 to 2017, allowing for an analysis of industry changes following the end of the Cold War. After the facts of each industry, the authors describe and analyse the structure, conduct and performance of the industry. The analysis of structure includes discussions of entry conditions, domestic monopoly, oligopoly structures and opportunities for competition. The section on conduct analyses price, non-price competition, including private and state-funded R D and performance, incorporates profitability, imports and exports, together with spin-offs and technical progress. The conclusion explores the future prospects for each nation's defence industry. Do defence industries have a future? What might the future defence firm and industry look like in 50 years' time? This volume is a vital resource and reference for anyone interested in defence economics, industrial economics, international relations, strategic studies and public procurement.

Ukraine Over the Edge Gordon M. Hahn, 2018-02-08. The Ukrainian crisis that dominated headlines in fall 2013 was decades in the making. Two great schisms shaped events: one within Ukraine, its western and southeastern parts divided along cultural and political lines; the other was driven by geopolitical factors. Competition between Russia and the West exacerbated Ukraine's divisions. This study focuses on the historical background and complex causality of the crisis, from the rise of mass demonstrations on Kiev's Maidan Nezalezhnosti (Independence Square) to the making of the post-revolt regime. In the context of a new cold war, the author sheds light on the role of radical Ukrainian nationalists and neofascists in the February 2014 snipers' massacre, the ouster of President Viktor Yanukovich and Russia's seizure of Crimea and involvement in the civil war in the eastern region of Donbass.
