Engaging in Educational Research Raqib Chowdhury, Mahbub Sarkar, Foez Mojumder, M Moninoor Roshid, 2018-10-01 This book reflects the paradigm shift now manifesting in Bangladesh's education system by highlighting recent empirical research. It shares essential insights by presenting research conducted on diverse aspects of current day education in Bangladesh including policy and governance equity access and participation curriculum and pedagogy assessment and education programs and projects run by NGOs. Further it offers a platform for these unique studies to be showcased and disseminated to scholars and researchers from developing and developed countries alike and represents a unique reference resource for the education research community in Bangladesh Asia and all over the world. With Foreword from Professor Serajul Islam Choudhury **Training Methodology: A Multidimensional Approach For Team Sports** José Afonso, Ana Filipa Silva, Beat Knechtle, Luca Paolo Ardigo, Filipe Manuel Clemente, Rodrigo Ramirez-Campillo, Gibson Moreira Praça, Rodrigo Aquino, Daniel Castillo, Javier Raya-González, Hugo Borges Sarmento, 2022-03-31 *Optimizing player health, recovery, and performance in basketball* Davide Ferioli, Daniele Conte, Aaron T. Scanlan, 2023-01-05 **A Physiologically-Based Approach to Study Different Types of Locomotion in Association with Core Performance** Erika Zemková, Magni Mohr, Dario Novak, Tomas Maly, 2024-11-11 Good posture and strong core muscles are essential for most athletic movements but also for everyday activities. Among them walking and running require lumbo pelvic stability and mobility for efficient movement and high level performance. This is especially important during a large range of trunk motions when changing the direction of movement an abrupt walk to run transition or extreme uphill and downhill walking or running. Such repetitive trunk loading over time can contribute to occurrence of back problems and lower limb injuries. To avoid these unwanted effects a novel approach to studying the physiology of locomotion in relation to spine motion and balance function is required. This can provide a basis for designing exercise programs specifically tailored for competitive athletes the healthy general population as well as those suffering from movement disorders. So far much effort has been devoted to investigating the biomechanical and physiological variations of locomotion including walking running swimming or hopping. However a surprising gap in the evidence is to what extent core strength contributes to effective locomotor performance and a healthy back. Studying the neurophysiological mechanisms underlying the control of postural and core stability with special reference to locomotion is therefore of great importance **Report on Rural Credit Survey 2014**, 2014 *The South Asian Energy Corridor* Amritanshu Shukla, Atul Shama, Saurabh Mishra, 2024-08-23 This new volume offers up to date coverage of the energy scenario in South Asia showcasing the major challenges being faced in the South Asian Energy Corridor in the context of energy security versus clean energy. The volume explores the role of diversifying supplies for the future to gain energy security that can lead to mapping joint ventures among conventional rival countries especially due to the rapidly emerging economies of this region. India China Japan and Pakistan by their location and demography occupy a major role in

this corridor The book examines the role of major technologies vis a vis dominant energy players in South Asia to put checks and balances on energy security along with clean energy resources hand in hand The economics along with the geopolitics of various pipelines ports and regional strategic relations strongly favor developing an energy bond among nations with both technologies as well as markets available within the same region The book strongly suggests increasing strategic energy cooperation between the major energy players to maximize mutual interest and reduce carbon emission for larger interests The volume first provides an overview of the South Asia Energy Corridor It then goes on to look at the energy scenarios in the countries of the region considering India s need for energy security and for clean energy initiatives The topics include advances in renewable energy in the region new fossil fuel reserves exploration in South Asia advances in wind and solar energy in the region and so much more
