Achieving the Circular Economy Jenny Palm, Nancy Bocken, 2021-05-20 Urbanisation and climate change are pushing cities to find novel pathways leading to a sustainable future The urban context may be viewed as a new experimentation space to accelerate the transition to a circular economy Urban symbiosis and the circular economy are emerging concepts attracting more and more attention within the urban context Moreover new business models are emerging around sharing and peer to peer practices which are challenging existing roles of actors in society These developments are having an important impact on the flows of resources and the use of the city infrastructure and each research area has taken a different perspective in the analysis of such impacts This Special Issue aims to explore what a circular city could constitute and how and why cities engage in circularity This Special Issue includes seven high quality papers on the theories and practices of circular cities Actors concepts methods tools the barriers to and enablers of circular cities are discussed and a solid base and inspiration for the future development

of today's digital Internet environment. It fills the gap for those who have found Internet Marketing books suffer from too much E and not enough marketing or are too narrowly or technically focused on e-commerce. A five-part organization covers e-marketing in context, e-marketing environment, e-marketing strategy, e-marketing management, and a global perspective on e-marketing. Special topics include competitive strategies, e-marketing strategy development, marketing planning, and performance metrics, and coverage of cutting-edge strategies beyond the Web, m-marketing, mobile databases, and analysis techniques, point of purchase scanning, and more. For an e-understanding of marketing and business.
