The Influence of Jomo Kenyatta and Julius K. Nyerere on Education and Development in Kenya and Tanzania Heinz Fischer, 1980 Quality Assurance in Higher Education in Eastern and Southern Africa Peter Neema-Abooki, 2021-08-23

This book examines the critical aspect of quality assurance maintenance of competitive standards in African higher education. It explores both the micro and macro levels of continental African higher education regulatory authorities and analyses different institutional regional and national practices for moving towards continental quality assurance approaches. Contributed to by scholars across Eastern and Southern Africa, the book considers conceptual, practical, epistemological, and policy dimensions of quality and quality assurance especially in relation to higher education in Africa. It therefore draws on research and local expertise to open up debate about how to assure and enhance the quality of higher education, providing a comprehensive review of eight countries and considering societal challenges. It aims to satisfy the need of more thoughtful and critical works on African education as produced by African educators. The uniqueness of this book lies in integrating both the theoretical and practical dimensions of quality to devise appropriate strategies for ensuring quality and standards in higher education in continental Africa and beyond. This authoritative book advocates for a timely discussion around the provision of good quality higher education and research in African universities and will be of great interest to academics, policy makers, researchers, and post graduate students in the fields of higher education, comparative education, and African studies.

Unyoking African University Knowledge, 2023-04-12. The discourse of decolonisation though littered with unresolved contestation in the university as an institution of higher learning has often been blamed on the impact of neoliberal globalisation philosophy. The volume focuses on unfinished project of decolonisation with an aim on African knowledge and the historical question of canonicity by keeping the emancipative dialogue alive. The authors place great scrutiny on the quality of curriculum offered in universities, arguing that a sound relevant curriculum original to the continent can save Africa's citizenry from challenges bedevilling socio-economic development. This book proposes a disruption and potential end to western hegemonic epistemologies that manifest the neoliberal geopolitical terrain in the form of cultural imperialism, epistemicide, and linguicide through a decolonial approach to the curriculum in African universities. It interrogates and challenges the neo-colonial entanglement in regional higher education policy processes coupled with the excessive dependence of regional stakeholders on western external actors for higher education policy and envisages a decolonial alternative future for the regionalisation of higher education in Africa. To this end, the book brings in a more philosophical and practical hermeneutic of knowledge production and dissemination that unyokes post-independence African universities from the bondage of erstwhile colonisers.
