Journal Of Infection Prevention:

Infection Prevention and Control Paul Elliott, Julie Storr, Annette Jeanes, 2023-06-01 An understanding of the social sciences within infection prevention and control IPC is important for those working in health and social care This new book Infection Prevention and Control A Social Science Perspective positions the specialty of IPC as more than a technical discipline concerned with microbes It is about people and their behaviour in context and the book therefore explores a number of relevant social sciences and their relationship to IPC across different contexts and cultures IPC is relevant to every person who works in and accesses health care and it remains a global challenge Exploring novel approaches and perspectives that expand our collective horizons in an ever changing and evolving IPC landscape therefore makes sense Key Features Offers new perspectives beyond the topic area of infection prevention and control to push the frontiers of knowledge and to challenge the status quo Interprofessional in nature and relevant to all those involved in the provision of medicine health and social care irrespective of their roles Truly international in nature in that the chapters have been developed by a range of individuals from across the globe

Informatics and Infection Prevention and Control: are We There Yet? Russell N. Olmsted, 2008 Infection Control for Advanced Practice Professionals Denise M. Korniewicz, Ph.D, RN, FAAN, 2013-10-01 Presents best practices for infection prevention and control in advanced practice Emphasizes team approach for infection control Case study provided for each chapter This professional reference combines research on the best practices for infection control in clinical settings with essential information for advanced practice nurses and physician assistants The book is organized by healthcare settings and the coverage ranges from small practice offices to large hospitals and medical institutions Each chapter is prefaced by a case study which is then incorporated into the theoretical material of the chapter as a continuing illustration This format provides a reader friendly instructional resource for advanced practice certifications and staff development From the Foreword At last is published a long needed text for advanced practice nurses APNs providing them with the information essential to the care of essentially every patient they will encounter Infection Control for Advanced Practice Professionals fills a void in the literature and recognizes the importance of a team approach to the prevention of infections in the variety of care settings in which APNs are practicing The book is particularly timely and relevant because it appropriately places infection prevention solidly within the larger patient safety movement and affirms that preventing infections is everybody's concern In acute care settings for example infection control has occasionally been relegated to the infection prevention specialist e.g. infection control nurse or hospital epidemiologist or the infection control committee This has shown to be ineffective in any setting It is those who touch the patients and oversee their care who must assume the responsibility for preventing untoward events such as infections While not all infections are preventable there is indeed room for improvement This comprehensive reference is a first and essential step in that direction Elaine Larson PhD RN FAAN CIC Anna C Maxwell Professor of Nursing Research Associate Dean for
