Journal Watch Psychiatry Cme:

Handbook of Psychiatric Education Jerald Kay, Edward K. Silberman, Linda Pessar, 2005 Broad based and comprehensive the book covers aspects of academic psychiatry responsibilities in teaching and education of students and residents This concise resource for faculty development in education incorporates recent innovations in teaching medical students and residents and details the newest technological tools for instruction

E-Learning for GP Educators John Sandars, Mayur Lakhani, Dr. Ian Banks, 2016-07-06 This work includes a Foreword by Mayur Lakhani Chairman of Council Royal College of General Practitioners General practitioners as a widely dispersed group are particularly reliant on e learning This book provides an overview of the topic and examines the past present and future challenges opportunities and benefits With chapters devoted to creating a website running short courses and standards and accreditation this guide explores both vocational training and continuing professional development It presents an evidence based practical approach for healthcare educators and practitioners with teaching responsibilities course organisers and healthcare professionals with an interest in e learning Excellent Leading edge As a practising GP I know just how hard it can be to keep up to date in a generalist discipline and showing progress Having access to information is the straightforward bit processing it and embedding it into clinical practice is the much bigger challenge as this book rightly points out As a user of e learning I know how useful this technique can be if undertaken properly and to a defined standard I have no doubt that this book will be a valuable contribution creating an innovative learning culture and society in healthcare Mayur Lakhani in his Foreword

The Clinical and Ethical Practice of Neuromodulation - Deep Brain Stimulation and Beyond Markus Christen, Sabine Müller, 2018-01-15 Neuromodulation is among the fastest growing areas of medicine involving many diverse specialties and affecting hundreds of thousands of patients with numerous disorders worldwide It can briefly be described as the science of how electrical chemical and mechanical interventions can modulate the nervous system function A prominent example of neuromodulation is deep brain stimulation DBS an intervention that reflects a fundamental shift in the understanding of neurological and psychiatric diseases namely as resulting from a dysfunctional activity pattern in a defined neuronal network that can be normalized by targeted stimulation The application of DBS has grown remarkably and more than 130 000 patients worldwide have obtained a DBS intervention in the past 30 years most of them for treating movement disorders This Frontiers Research Topics provides an overview on the current discussion beyond basic research in DBS and other brain stimulation technologies Researchers from various disciplines who are working on broader clinical ethical and social issues

related to DBS and related neuromodulation technologies have contributed to this research topic Urology and Nephrology Alan W. Levine,2001 Nearly one in four American adults are on psychiatric drugs and Ritalin production has increased 800 percent since 1990 yet the mental health industry laments the fact that two thirds of us with diagnosable mental disorders do not seek treatment The author argues that institutional mental health s ever increasing diseases disorders and drugs divert us from examining an important rebellion This rebellion mainly passive and too often self destructive is against an increasingly impersonal and coercive institutional society Institutional society s worship of speed power and technology has created fantastic wealth at least for some of us but its disregard for human autonomy community and diversity has come with a cost
