Les populations de langue française (F) et de langue anglaise (A) ont été calculées d'après la première langue officielle parlée selon la définition du Règlement sur les langues officielles.

Les données pour la première langue officielle parlée comprennent les réponses multiples qui ont été rapportées également entre le français et l'anglais, c'est-à-dire que le nombre de réponses « Français et français » a été doublé par deux et le quotient a été ajouté au nombre de réponses uniques sous « Anglais » et sous « Français ».

La proportion des personnes de langue française (F) et de langue anglaise (A) par province ou territoire est représentée par le pourcentage, puisque les données excluent le collégial « ni français ni anglais » pour la première langue officielle parlée.
