Nursing Practice Ian Peate, Karen Wild, Muralitharan Nair, 2014-10-20 Nursing Practice is the essential textbook to support you throughout your entire nursing degree from your first year onwards. It explores all the clinical and professional issues that you need to know in one complete volume. Written in the context of the latest Nursing and Midwifery Council Standards for Pre Registration Nursing Education and the Essential Skills Clusters, this book covers all fields of nursing: Adult, Child, Mental Health, Learning Disabilities, and also Maternity care in both acute and community settings. With full colour illustrations and plenty of activities and user friendly features throughout, this evidence based text encompasses essential nursing theory and practice, providing students with information to support their success. Learning features in the book include: Hear it from the experts, tips and advice from real life nurses, patients and their carers, and student nurses; Red Flags alerting the student to potential dangers; Primary Care Considerations informs students about care issues in the community setting; Fields boxes giving further insight into other fields of nursing, making the book relevant to all fields of nursing practice; Medicines Management boxes provide key information about medicines; Self assessment and activities throughout. A companion website to this title is available at www.wileynursingpractice.com. Here you will find a range of resources for both the student and the lecturer including: Over 350 interactive multiple choice questions; Flashcards; Glossary; Links to references and further reading; Illustrations from the book; Worksheets.

Official Gazette Philippines, 2009 **Annual Report** India. Department of Health & Family Welfare, 2013 **Clinical Education in Geriatrics** Judith L. Howe, Thomas V. Caprio, 2020-05-21 This book highlights both recent innovations in professional health curricula and continuing education and interventions aimed at improving student attitudes towards geriatrics and aging. The contributors cover areas including simulation, online training and standardized patients for evaluation, but also emphasize the important end result of clinical training: to take care of real older adults outside the classroom. Importantly, this underscores the development of powerful learning experiences of students by sensitizing them to the frameworks of palliative care, cancer care, sexuality and aging research, all of which serves as a powerful catalyst for creating a pipeline of students who embrace aging as a central theme of their future work. As increased training in geriatrics is required to attune the health care workforce to the needs of older adults, this book will be of interest to those seeking to create a more age friendly healthcare curriculum. This book was originally published as a special issue of the Gerontology Geriatrics Education journal.
