- The outside phone cannot find the outside network
  - Check whether the outside phone is activated (in or out)
  - Check the value of the "light" from the "line description" of the outside network and the number from the "number" after selecting phone (in, status) under both the network and the number (status) in your phone
- There is something wrong with the outside network while using it
  - Please try to re-connect with the outside phone after setting it (off and selecting the network)
  - Check the changing value of the network by calling from the changing the value of the network (in or out). Then you may see the value of the network is connected with the outside phone

- The wireless network always disconnects or fails when often connected to the mobile device.
- The wireless network (point-to-point) is too slow to be useful.
- There is an interference between the mobile device and the wireless network, or the wireless device is located out of range. Please do not cover the wireless network with your hand in order to maximize the continuous capacity of the signal. Please try to keep the wireless network and the mobile device in the same direction.

1994). The authors note that the data are not enough to fully understand the impact of the environment on a person's health. As a result, they suggest that future research should focus on understanding the role of the environment in the development of disease. They also suggest that future research should focus on understanding the role of the environment in the development of disease. They also suggest that future research should focus on understanding the role of the environment in the development of disease.
