Js World Affairs 2015:

Sectarianism, De-Sectarianization and Regional Politics in the Middle East Samira Nasirzadeh, Elias Ghazal, Ana Maria Kumarasamy, Eyad Alrefai, Simon Mabon, 2024-01-25 Following the Arab Uprisings new ways of understanding sectarianism and sect based differences emerged But these perspectives while useful reduced sectarian identities to a consequence of either primordial tensions or instrumentalised identities While more recently third way approaches addressed the problems with these two positions the complexity of sectarian identities within and across states remains unexplored This book fills the gap in the literature to offer a more nuanced reading of both sectarian identities and also de sectarianization across the Middle East To do so the volume provides a comparative account looking at Iraq Bahrain Yemen Syria and Lebanon It examines the ways in which sect based difference shapes regional politics and vice versa The book also contributes to burgeoning debates on the role of protest movements in sectarianism Chapters are split across three main sections the first looks at sects and states the second traces the relationship between sects and regional dynamics and the third examines de sectarianization that is the contestation and destabilization of sectarian identities in socio political life Each section provides a more holistic understanding of the role of sectarian identities in the contemporary Middle East and shows how sectarian groups operate within and across state borders and why this has serious implications for the ordering of life across the Middle East

US Foreign Policy in a Challenging World Marco Clementi, Matteo Dian, Barbara Pisciotto, 2017-07-18 This book examines how the US is dealing with the challenge of reconciling its global interests with regional dynamics and how it is able to produce and sustain order at the system level and within regional subsystems The book comprises four parts the first of which addresses global issues such as nonproliferation trade and freedom of the seas US policies in these areas are carefully analyzed considering whether and how they have been differently implemented at the regional level The remaining parts of the book focus on the US posture toward specific regions Europe the Middle East and East Asia The policies adopted by the US to confront the most relevant challenges in each region are identified and the ways in which policies in a specific region influence or are influenced by challenges in another region are explored The book is a rich source of knowledge on the nature of the balance that the US has pursued between global and regional interests It will be of much interest to scholars to practitioners to postgraduate PhD students of international relations theory and American foreign policy and to all with an interest in the ability of the US to produce international order

The Politics of Religious Tourism Dino Bozonelos, Polyxeni Moira, 2023-07-28 Addressing a dearth of literature in this area this book provides a comprehensive overview and framework of study of the politics of religious tourism Existing work shows awareness that politics is present but the approach has been one of benign neglect and or a priori assumptions about the role of politics in the management of sacred sites Previous literature is fragmented into various perspectives and approaches that best serve different disciplinary interests By understanding the politics of religious tourism through the various perspectives and approaches from the

discipline of political science law public policy and other fields This book will be of great interest to researchers and students of religious tourism pilgrimage as well as related subjects such as political science economics sociology tourism law studies and religious studies *China's Cultural Diplomacy* Xin Liu,2019-10-02 This book examines China's contemporary global cultural footprints through its recent development of cultural diplomacy The volume presents an alternative analytical framework to examine China's cultural diplomacy which goes beyond the Western defined concept of soft power that prevails in the current literature This new approach constructs a three dimensional framework on Orientalism cultural hegemony and nationalism to decipher the multiple contexts which China inhabits historically internationally and domestically The book presents multiple case studies of the Confucius Institute and compares the global programme located around the world with its Western counterparts and also with other Chinese government sponsored endeavours and non government initiated programmes The author aims to solve the puzzle of why China's efforts in cultural diplomacy are perceived differently around the world and helps to outline the distinctive features of China's cultural diplomacy This book will be of much interest to students of diplomacy Chinese politics foreign policy and International Relations in general **Beyond Gridlock** Thomas Hale,David Held,2017-09-25 It is now conventional wisdom to see the great policy challenges of the 21st century as inherently transnational It is equally common to note the failures of the international institutions the world relies on to address such challenges As the acclaimed 2013 book *Gridlock* argued the world increasingly needs effective international cooperation but multilateralism appears unable to deliver it in the face of deepening interdependence rising multipolarity and the growing complexity and fragmentation that characterise the global order The *Gridlock* authors have now partnered with a group of leading experts to offer a trenchant reassessment of elements of the argument Comparing anomalies and exceptions to multilateral dysfunction across a number of spheres of world politics *Beyond Gridlock* explores seven pathways through and beyond gridlock While multilateralism continues to fall short *Beyond Gridlock* identifies systematic means to avoid or resist these forces and turn them into collective solutions This book offers a vital new perspective on world politics as well as a practical guide for positive change in global policy **Women and Gender in International History** Karen Garner,2018-06-28 Most governments and global political organizations have been dominated by male leaders and structures that institutionalize male privilege As *Women and Gender in International History* reveals however women have participated in and influenced the traditional concerns of international history even as they have expanded those concerns in new directions Karen Garner provides a timely synthesis of key scholarship and establishes the influential roles that women and gender power relations have wielded in determining the course of international history From the early 20th century onward women have participated in state to state relations and decisions about when to pursue diplomacy or when to go to war to settle international conflicts Particular women as well as masculine and feminine gender role constructs have also influenced the establishment and evolution of intergovernmental organizations and their political social and economic policy making

regimes and agencies Additionally feminists have critiqued male dominated diplomatic establishment and intergovernmental organizations and have proposed alternative theories and practices This text integrates women and gender and feminist analyses into the study of international history in order to produce a broader understanding of processes of international change during the 20th and 21st centuries *Making Sense of Cyber Capabilities for Small States* Francis C.

Domingo,2022-03-28 Domingo explores the potential of cyber capabilities for small states in the Asia Pacific the most active region for cyber conflict He develops a systematic explanation for why Brunei New Zealand and Singapore have developed or are developing cyber capabilities Studies on cyber conflict and strategy have substantially increased in the past decade but most have focused on the cyber operations of powerful states This book moves away from the prominence of powerful states and explores the potential of cyber capabilities for small states in the Asia Pacific the most active region for cyber conflict It develops a systematic explanation of why Brunei New Zealand and Singapore have developed or are developing cyber capabilities despite its obscure strategic value The book argues that the distribution of power in the region and a technology oriented strategic culture are two necessary conditions that influence the development of cyber capabilities in small states Following this argument the book draws on neoclassical realism as a theoretical framework to account for the interaction between these two conditions The book also pursues three secondary objectives First it aims to determine the constraints and incentives that affect the utilization of cyber capabilities as foreign policy instruments Second the book evaluates the functionality of these cyber capabilities for small states Lastly it assesses the implications of employing cyber capabilities as foreign policy tools of small states This book will be an invaluable resource for academics and security analysts working on cyber conflict military strategy small states and International Relations in general **Yearbook of International**
