June 2013 Memorandum Geography Paper 1:

The Oxford Companion to the Economics of China Shenggen Fan, Ravi Kanbur, Shang-Jin Wei, Xiaobo Zhang, 2014-10-30
China's rise as an economic powerhouse raises a number of questions that are the subject of lively debate. How did the country do it? How applicable are the lessons of China's economic reform of the past thirty years to the challenges it faces in the next three decades? What does the detailed pattern of China's success and challenges look like at the sub-sectoral and sub-national levels and what does this mean for future policy? How will China's role as a global economic player evolve? The Oxford Companion to the Economics of China presents an original collection of perspectives on the Chinese economy's past, present and future. 99 entries written by the leading China analysts of our time. The topics covered include the China model, future prospects for China, China and the global economy, trade and the Chinese economy, macroeconomics and finance, urbanisation, industry and markets, agriculture and rural development, land, infrastructure and environment, population and labour, dimensions of wellbeing and inequality, health and education, gender equity, regional divergence in China and a selection of perspectives on some of China's provinces. The Editors are four global leaders in Chinese economic analysis and policy who between them have held or hold the following positions: Director General, International Food Policy Research Institute; Co-Editor, China Economic Review; President, Chinese Economists Society; Assistant Director of Research at the IMF; Principal Adviser to the Chief Economist of the World Bank and Professors of Economics at Ivy League Universities.

Islam and the Liberal State Stephen H. Jones, 2020-11-26
National identity and liberal democracy are recurrent themes in debates about Muslim minorities in the West. Britain is no exception with politicians responding to claims about Muslims' lack of integration by mandating the promotion of fundamental British values including democracy and individual liberty. This book engages with both these themes, addressing the lack of understanding about the character of British Islam and its relationship to the liberal state. It charts a gradual but decisive shift in British institutions concerned with Islamic education, Islamic law and Muslim representation since Muslims settled in the UK in large numbers in the 1950s. Based on empirical research including interviews undertaken over a ten-year period with Muslims and analysis of public events organized by Islamic institutions, Stephen Jones challenges claims about the isolation of British Islamic organizations and shows that they have decisively shaped themselves around British public and institutional norms. He argues that this amounts to the building of a distinctive British Islam. Using this narrative, the book makes the case for a variety of liberalism that is open to the expression of religious arguments in public and to associations between religious groups and the state. It also offers a powerful challenge to claims about the insularity of British Islamic institutions by showing how the national orientation of Islam called for by British policymakers is in fact already happening.

The State of African Cities, 2014 United Nations Publications, 2015-09-10 The African continent is currently in the midst of simultaneously unfolding and highly significant demographic economic technological environmental urban and socio political transitions Africa's economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets Despite significant overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems These seem to indicate that the development trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all This report therefore argues for a bold re imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change
