June 2013 Question Paper Mathematical Literacy:

Must Inclusion be Special? Jonathan Rix, 2015-06-05 *Must Inclusion be Special* examines the discord between special and inclusive education and why this discord can only be resolved when wider inequalities within mainstream education are confronted. It calls for a shift in our approach to provision from seeing it as a conglomeration of individualised needs to identifying it as a conglomeration of collective needs. The author examines the political, medical and cultural tendency of current times to focus upon the individual and contrasts this with the necessity to focus on context. This book distinguishes the theoretical perspectives that are often associated with special or inclusive education and the broad range of interests which depend upon their ongoing development. This examination leads to a problematisation of mainstream education provision, our understanding of why social inequities emerge and how additional support can overcome these inequities. Further chapters explore the underlying challenges which emerge from our use and understanding of the notions of special and inclusive, outlining an alternative approach based upon a community of provision. This approach recognises the interconnectedness of services and the significance of context and it encapsulates the aspiration of much international legislation for participation and inclusion for all. But it also assumes that we tend towards diffuse practices, services, policies, settings and roles spread across provision which is variously inclusive and exclusionary. In seeking to create equitable participation for all, support needs to shift its focus from the individual to this diffuse network of contexts. *Must Inclusion be Special* emerges from the research base which problematises inclusion and special education, drawing upon examples from many countries. It also refers to the author's research into pedagogy, language and policy and his experiences as a teacher and the parent of a child identified with special educational needs.

Commonsense Methods for Children with Special Educational Needs Peter Westwood, 2015-04-30 This fully revised and updated seventh edition of *Commonsense Methods for Children with Special Educational Needs* continues to offer practical advice on evidence-based teaching methods and intervention strategies for helping children with a wide range of disabilities or difficulties. The advice the author provides is embedded within a clear theoretical context and draws on the latest international research and literature from the field. Coverage includes learning difficulties and disabilities, students with autism spectrum disorders, intellectual disability, physical or health issues and sensory impairments, gifted and talented students, developing social skills and self-management, behaviour management, teaching methods, literacy and numeracy, curriculum differentiation and adaptive teaching, computer-based instruction and e-learning. Peter Westwood also provides additional information and advice on transition from school to employment for students with disabilities, lesson study, e-learning and computer-aided instruction and reflects on the important changes made within the latest Diagnostic and Statistical Manual of Mental Disorders (DSM 5).

Digital Feedback in the Research Planning Process: Peers Pedagogies, and Technologies Jennifer Schluer, 2025-08-05 The book Digital Feedback in the Research Planning Process Peers Pedagogies and Technologies offers a comprehensive exploration of how iterative dialogic peer review supports academic inquiry at Master s and doctoral levels To capitalize on participants heterogeneity the pedagogical design integrates peer scaffolding within an inquiry based inverted classroom approach that is situated in an open digitally mediated feedback environment Drawing on empirical data from the TESOL Research

Colloquium this study investigates three asynchronous digital feedback formats cloud based digital boards recorded audio visual files and online forum exchanges across successive phases of research planning from topic generation to proposal presentation The triangulation of student perceptions feedback analyses and course evaluations confirms the efficacy of the pedagogical design while highlighting the need for redefined roles of students and supervisors targeted training in pro active feedback exchanges and strategic tool selection based on communicative affordances Rich with practical suggestions and transferable frameworks this book equips teacher educators and researchers with actionable insights to promote student agency peer learning and the competent use of digital technologies including Artificial Intelligence in higher education

An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree
