

Design

Design influences portability & can be categorised into 4

2-in-1s

These are versatile devices that can function as both, a laptop & as a tablet. They can be of 2 types - bend-backs or detachables. Bend-backs are better laptops than tablets while detachables offer a superior tablet experience.

Thin & lightweight

These are laptops that usually weigh under 1.5kgs & have a display size of 13" or lower. They are slim & easy to carry around. Most laptops in this category focus on longer battery life.

Regular clamshell

These have a traditional design with a screen that folds down to the keyboard & mousepad. They are affordable and usually deliver more performance for your money than other portable laptops.

Gaming laptops

These are generally heavier as they are equipped with powerful hardware & dedicated graphics card. They compromise on portability for superior performance and are ideal for usage in one place.
