Larchitecture Annes 30 Paris:

France Jean-Louis Cohen, 2014-08-15 Everyone knows Notre Dame the Eiffel Tower and the chateaux of the Loire Valley but French architects have also produced some of the most iconic buildings of the twentieth century playing a central role in the emergence and development of modernism In France Jean Louis Cohen presents a complete narrative of the unfolding architectural modernity in the country grappling not only with the buildings but also with the political and critical context surrounding them Cohen examines the developments in urban design and architecture within France depicting the continuities and breaks in French architecture since 1900 against a broader international background Describing the systems of architectural exchange with other countries including Italy Germany Russia and the United States he offers a new view on the ideas projects and buildings otherwise so often considered only from narrow nationalistic perspectives Cohen also maps the problematic search for a national identity against the background of European rivalries and France s colonial past Drawing on a wealth of recent research this authoritatively written book will challenge the way design professionals and historians view modern French architecture Art in France, 1900-1940 Christopher Green, 2000-01-01 This study sets

developments within the frameworks both of their unstable social political and intellectual world and of the official and independent institutions of art **The Routledge Companion to Art Deco** Bridget Elliott, Michael Windover, 2019-06-25 Scholarly interest in Art Deco has grown rapidly over the past fifty years spanning different academic disciplines This volume provides a guide to the current state of the field of Art Deco research by highlighting past accomplishments and promising new directions Chapters are presented in five sections based on key concepts migration public culture fashion politics and Art Deco s afterlife in heritage restoration and new media The book provides a range of perspectives on and approaches to these issues as well as to the concept of Art Deco itself It highlights the slipperiness of Art Deco yet points to its potential to shed new light on the complexities of modernity **Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl**

Avery Library, 1997 L'Architecture, 1926 *AÑOS 30* Jordana Mendelshon, 2012 The 1930s was a turbulent decade across the world with the rise of totalitarian governments the outbreak of the Spanish Civil War the start of World War II and the constant migration of artists as part of evolving social economic and political geographies that were marked by utopian dreams and devastating upheavals This book approaches the 1930s and seeks to explore the microhistories that detail the movement of artists across borders the potential transformation of artistic styles and the concurrent struggle to preserve old networks amidst the creation of new communities in often radically new contexts of artistic production Touching on the works of Cartier Bresson Max Ernst Miro Picasso and many more as well as examining aspects of Surrealism Abstraction propaganda and photography this is an insightful account of one of the most turbulent decades in the history of art
