**Assessing Academic Literacy in a Multilingual Society** Albert Weideman, John Read, Theo du Plessis, 2020-11-02  
South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience. School Rethink 2.0 Frederick M. Hess, Michael B. Horn, Juliet Squire, 2025-02-12 Ten brilliant approaches that are disrupting US education and actionable advice for their broader implementation. *The Leading Edge of Early Childhood Education* Nonie K. Lesaux, Stephanie M. Jones, 2021-02-23 The Leading Edge of Early Childhood Education aims to support the effort to simultaneously scale up and improve the quality of early childhood education by bringing together relevant insights from emerging research to provide guidance for this critical fledgling field. It reflects the growing recognition that early childhood experiences have a powerful effect on children's later academic achievement and long term life outcomes. Editors Nonie K. Lesaux and Stephanie M. Jones bring together an impressive array of scholarly contributors. Topics include creating learning environments that support children's cognitive and emotional development; identifying and addressing early risk factors; using data to guide educators' practice; and capitalizing on the use of technology. Recent years have seen a surge of local, state and national initiatives aimed at expanding and improving early childhood initiatives, particularly regarding access to preK programs. The Leading Edge of Early Childhood Education promises to be a valuable resource for those charged with enacting the next level of work in this critical area. **Leading Change in Teacher Education** Thuwayba Al Barwani, Maria Assunção Flores, David Imig, 2018-12-12 The international attempt to expand schooling despite dealing with an insufficient number of trained teachers has placed significant pressure on teacher education. Continued effort to change all aspects of teacher education, including ways of learning, methods of practice, institution interaction and assessment of teaching ability in order to fulfil the desire to offer inclusive and equitable teaching for all is a serious consideration. In response to this increased attention on cross-national campaigns, Leading Change in Teacher Education features discussions covering what has been done, how and why the change has happened, the journey itself and the challenges encountered along the way, alongside contributions from international academics who share their reflections and suggestions for a way forward despite a global shortage of teachers. Strategies surrounding the design and delivery of education now centre on improving how teachers are prepared, supported and
