

The award-winning **Radia R-800P** by BAG Radia represents the finest design and engineering technology ever available in an architectural loudspeaker. Consistent with the BAG legacy of a true line source, the R-800P delivers new levels of sensitivity, output and accuracy with performance that rivals the finest freestanding loudspeakers. Ideally suited for either life-like home theater or critical music listening, the R-800P is as elegant in appearance as it is awesome in sonic fidelity. When paired with other Radia Series speakers and our BGX subwoofer in particular, the result is an overall experience that must be heard to be believed.

At the heart of the R-800P is BAG's critically-acclaimed Neo10- a 10"X 5" planar ribbon midrange driver based on the company's proprietary and patented technology. Significantly larger in size than other BAG ribbons, the Neo10 sets new standards for sensitivity, output, power handling and accuracy. In fact, the driver's size allows it to move substantial amounts of air while keeping diaphragm excursion at relatively low levels. Controlled excursion translates into lower distortion and higher sensitivity while providing amazing clarity and linear response.

A (16) driver line array of BAG's benchmark Neo3PDR tweeters handle the R-800P's high frequencies and define the system's precise vertical coverage.

Completing R-800P is its prodigious low frequency section, comprised of dual 8" long throw woofers with Kevlar®-paper composite cones. The unique woofer basket design reduces air turbulence and improves cooling. The woofers, each located at the top and bottom of the baffle, utilize dual gap (XBL<sup>2</sup>) technology which features a unique motor structure yielding twice the linear excursion of a conventional woofer and virtually eliminates voice coil inductance modulation. The result is significantly lower distortion, wider dynamics and greatly improved performance over its predecessor.

- Line Source-acoustically-coupled array with controlled vertical and wide horizontal dispersion
- Patent-pending Neo10 planar ribbon midrange driver
- Famous Neo3PDR tweeter utilized in a (16) driver line array
- Unique dual gap woofer topology delivers dramatically lower distortion
