*Decolonising Science, Technology, Engineering and Mathematics (STEM) in an Age of Technocolonialism* Nhemachena, Artwell,Hlabangane, Nokuthula,Matowanyika, Joseph Z. Z.,2020-03-02 Positing the notions of coloniality of ignorance and geopolitics of ignorance as central to coloniality and colonisation this book examines how colonialists socially produced ignorance among colonised indigenous peoples so as to render them docile and manageable Dismissing colonial descriptions of indigenous people as savages illiterate irrational prelogical mystical primitive barbaric and backward the book argues that imperialists colonialists contrived geopolitics of ignorance wherein indigenous regions were forced to become ignorant hence containable and manageable in the imperial world Questioning the provenance of modernist epistemologies the book asks why Eurocentric scholars only contest the provenance of indigenous knowledges artefacts and scientific collections Interrogating why empire sponsors the decolonisation of universities epistemologies in indigenous

territories while resisting the repatriation restitution of indigenous artefacts the book also wonders why Westerners who still retain indigenous artefacts skulls and skeletons in their museums universities and private collections do not consider such artefacts and skulls to be colonising them as well The book is valuable to scholars and activists in the fields of anthropology museums and heritage studies science and technology studies decoloniality policymaking education politics sociology and development studies

*The African Mother Tongue and Mathematical Ideas* Abdul Karim Bangura,2020-06-02 This book by renowned scholar Dr Abdul Karim Bangura combines linguistics and mathematics to show how and why African centred mathematical ideas can be a driving force in Africa s development efforts Bangura explores the concept that Africa has been the centre of the History of Mathematics for thousands of years as the civilizations that emerged across the continent developed contributions which would enrich both ancient and modern understanding of nature through mathematics However scholars and other professionals working in the field of mathematics education in Africa have identified a plethora of issues in carrying out their tasks This is highlighted by one of the most compelling arguments in the book which is that a major reason for these problems is the fact that the African mother tongues has been greatly neglected in the teaching of mathematics in the continent Bangura asserts that a change has to be made in order for Africa to benefit from the exceptional opportunities mathematics offer showing that even if there is a great body of work connecting linguistics and mathematics few analyses have been performed on the link between African languages and mathematics and the ones that have been made are not theoretically grounded on linguistics Thus the book begins by identifying the objects of study of linguistics and mathematics and delineates which ones they have in common Next since the object of study of linguistics is language the nine design features of language are employed to examine each of the objects as it pertains to African languages After that mathematical ideas of sustainability and those of tipping points are suggested as means to help Africa s development efforts

*Gendering Ethnicity in African Women's Lives* Jan Bender Shetler,2015-05-05 The elegists ancient Rome s most introspective poets filled their works with vivid first person accounts of dreams Emma Scioli examines these varied and visually striking textual dreamscapes arguing that the poets exploited dynamics of visual representation to share with readers the intensely personal experience of dreaming
