Boysen, 2007 *Opportunity Makes the Cheater: High School Students and Academic Dishonesty* Andrej Sorgo, 2015 Academic Dishonesty Among High School Students Anthony J. Galvan, 2014 Academic dishonesty is still a challenge for many school districts Students have been more creative and inventive in finding ways to evade being caught by educators Many students spend more time planning ways to cheat to enhance their outcomes than they actually spend studying and preparing for the test There is a spectrum of cheating and some students think it is acceptable if the teacher allows it and doesn't monitor the classroom well enough to discourage cheating Along the spectrum other students feel it is acceptable to work together share answers or use outside resources if they feel the teacher is being too hard or giving too much work Technology has made it more difficult to monitor academic dishonesty and many websites even encourage cheating by giving in depth details for cheating and not getting caught It is a challenge for school administrators to enforce student handbook guidelines regarding academic cheating if the rules and expectations are not clearly defined Laboratory Measure of Cheating Predicts School Misconduct Alain Cohn, Samuel Huber, Michel André Maréchal, 2016 *Laboratory Measure of Cheating Predicts Misbehavior at School* Alain Cohn, 2017 Laboratory experiments provide insights into the drivers of cheating behaviour but it is unclear to what extent cheating in the lab generalizes to the field We conducted an experiment with middle and high school students to test whether a common laboratory measure of cheating predicts three types of school misconduct i disruptiveness in class ii homework noncompletion and iii absenteeism We find that students who cheat in the experimental task are more likely to misbehave at school suggesting that experimental measures of cheating generalize to rule violating behaviour in naturally occurring environments A Study of Cheating in the Junior High School P.
