'Macro-regional' *Europe in the Making* Stefan Gänzle, Kristine Kern, 2015-10-19 Macro regional strategies seek to improve the interplay of the EU with existing regimes and institutions and foster coherence of transnational policies Drawing on macro regional governance and Europeanization this edited volume provides an overview of processes of macro regionalization in Europe displaying evidence of their significant impact **Stopping the Spies** Jane Duncan, 2018-06-01 Is South Africa on

its way to becoming a surveillance state and will it need a whistleblower In 2013 former National Security Agency NSA contractor Edward Snowden leaked secret documents revealing that state agencies like the NSA had spied on the communications of millions of innocent citizens International outrage resulted but the Snowden documents revealed only the tip of the surveillance iceberg Apart from insisting on their rights to tap into communications more and more states are placing citizens under surveillance tracking their movements and transactions with public and private institutions The state is becoming like a one way mirror where it can see more of what its citizens do and say while citizens see less and less of what the state does owing to high levels of secrecy around surveillance In this book Jane Duncan assesses the relevance of Snowden s revelations for South Africa In doing so she questions the extent to which South Africa is becoming a surveillance society governed by a surveillance state Duncan challenges members of civil society to be concerned about and to act on the ever expanding surveillance capacities of the South African state Is surveillance used for the democratic purpose of making people safer or is it being used for the repressive purpose of social control especially of those considered to be politically

threatening to ruling interests She explores the forms of collective action needed to ensure that unaccountable surveillance does not take place and examines what does and does not work when it comes to developing organised responses

The Scottish Independence Referendum Aileen McHarg, Tom Mullen, Alan Page, Neil Walker, 2016-06-30 The September 2014 Scottish independence referendum was an event of profound constitutional and political significance not only for Scotland but for the UK as a whole Although Scottish voters chose to remain in the UK the experience of the referendum and the subsequent political reaction to the No vote that triggered significant reforms to the devolution settlement have fundamentally altered Scotland's position within the Union The extraordinary success of the Scottish National Party at the 2015 General Election also indicates that the territorial dimension to UK constitutional politics is more prominent than ever destabilising key assumptions about the location and exercise of constitutional authority within the UK The political and constitutional implications of the referendum are still unfolding and it is by no means certain that the Union will survive Providing a systematic and academic analysis of the referendum and its aftermath this interdisciplinary edited collection brings together public lawyers political scientists economists and historians in an effort to look both backwards to and forwards from the referendum The chapters evaluate the historical events leading up to the referendum the referendum process and the key issues arising from the referendum debate They also explore the implications of the referendum both for the future governance of Scotland and for the UK's territorial constitution drawing on comparative experience in order to understand how the constitution may evolve and how the independence debate may play out in future
