Metabolic Syndrome A Growing Epidemic:

The Shapes of Epidemics and Global Disease Andrea Patterson, Ian Read, 2020-08-28 This volume investigates the multifaceted SHAPES socio historic artistic political and ecological significance of global disease It challenges conventional views of infection and transmission by associating epidemics with ideologies and their accompanying institutions It argues that the physical threat of epidemics is irrevocably linked to culture economic resources social class and power Epidemics involve both the infected and non infected affect the local and global and they expose control and neglect This book provides a radical collaborative approach drawing contributors from closely related and vastly distant fields in the search for innovative ways to address human suffering and to find real solutions that may determine whether people live or die Such an approach is needed within an increasingly interconnected world where both pathological diseases and health behaviors are infectious Experts from fifteen diverse disciplines in the natural sciences social sciences and arts and humanities present case studies from across the world and time demonstrating the uniqueness of each disease and epidemic in its place but also the shared experiences that span human life and death In order to identify measure and control epidemics we must understand epidemics more as long biosocial processes than abrupt events in nature or culture Such methodology examines the meaning we attach to epidemics as well as their material reality and provides a more complete understanding of how epidemics shape and are shaped

Hepato-Pancreato-Biliary Malignancies Cataldo Doria, Jason N. Rogart, 2022-09-30 Hepato Pancreato Biliary cancers are increasing in incidence with pancreatic cancer now accounting for the third most cancer deaths in the United States Typically these malignancies as a group are managed by the same key providers comprising a multidisciplinary team This book is intended to provide a comprehensive review of the current knowledge in the field of hepato pancreato biliary malignancies focusing on the practical and clinical care of patients We take the approach of combining the collective expertise of an interventional gastroenterologist and a hepato pancreato biliary surgeon to provide the readers with accurate succinct and pragmatic information needed to formulate the most appropriate treatment plan for their patients with the aim of the best possible outcome Managing patients with these cancers continues to be challenging because of continued dismal survival rates Each section in this text is written by experts in their respective field summarizing the most state of the art contemporary diagnostic and therapeutic tools available in the field We believe this book will prove to be an invaluable comprehensive resource for all members of the multidisciplinary team caring for patients with hepato pancreato biliary malignancies
