of new social and economic rights altered existing hierarchies and expectations about how people should interact with each other in the courthouse Drawing on extensive public archives and private archives kept by the Ministry of Justice but also using case studies from other jurisdictions the book details how civil servants judges lawyers architects engineers and security experts have talked about courthouses and the people that populate them In doing so it uncovers a changing history of ideas about how the competing goals of transparency majesty participation security fairness and authority have been achieved and the extent to which aspirations towards equality and participation have been realised in physical form As this book demonstrates the power of architecture to frame attitudes and expectations of the justice system is much more than an aesthetic or theoretical nicety Legal subjects live in a world in which the configuration of space the cues provided about behaviour by the built form and the way in which justice is symbolised play a crucial but largely unacknowledged role in creating meaning and constituting legal identities and rights to participate in the civic sphere Key to understanding the modern day courthouse this book will be of interest to scholars and students in all fields of law architecture sociology political science psychology and criminology New metric handbook: planning and design data P.
