James Watt Making The World Anew Critical Lives:

James Watt Ben Russell, 2014-08-15 Scottish inventor and mechanical engineer James Watt 1736 1819 is best known for his pioneering work on the steam engine that became fundamental to the incredible changes and developments wrought by the Industrial Revolution But in this new biography Ben Russell tells a much bigger richer story peering over Watt s shoulder to more fully explore the processes he used and how his ephemeral ideas were transformed into tangible artifacts Over the course of the book Russell reveals as much about the life of James Watt as he does a history of Britain s early industrial transformation and the birth of professional engineering To record this fascinating narrative Russell draws on a wide range of resources from archival material to three dimensional objects to scholarship in a diversity of fields from ceramics to antique machine making He explores Watt s early years and interest in chemistry and examines Watt s partnership with Matthew Boulton with whom he would become a successful and wealthy man In addition to discussing Watt s work and incredible contributions that changed societies around the world Russell looks at Britain s early industrial transformation Published in association with the Science Museum London and with seventy illustrations James Watt is not only an intriguing exploration of the engineer s life but also an illuminating journey into the broader practices of invention in the eighteenth and early nineteenth centuries Published in association with the Science Museum London

Making Modern Science, Second Edition Peter J. Bowler, Iwan Rhys Morus, 2020-08-17 In this new edition of the top selling coursebook seasoned historians Peter J Bowler and Iwan Rhys Morus expand on their authoritative survey of how the development of science has shaped our world Exploring both the history of science and its influence on modern thought the authors chronicle the major developments in scientific thinking from the revolutionary ideas of the seventeenth century to contemporary issues in genetics physics and more Thoroughly revised and expanded the second edition draws on the latest research and scholarship It also contains two entirely new chapters one that explores the impact of computing on the development of science and another that shows how the West used science and technology as tools for geopolitical expansion Designed for entry level college courses and as a single volume introduction for the general reader Making Modern Science presents the history of science not as a series of names and dates but as an interconnected and complex web of relationships joining science and society

Iron Men David Waller, 2016-09 In the early nineteenth century Henry Maudslay an engineer from a humble background opened a factory in Westminster Bridge Road a stone s throw from the Thames His workshop became in its day the equivalent of Google and Apple combined attracting the country s best in engineering talent Their story of innovation and ambition tells how precision engineering made the industrial revolution possible helping Great Britain become the workshop of the world

British Literature and Technology, 1600-1830 Kristin M. Girtten, Aaron R. Hanlon, 2023-01-13

Enlightenment era writers had not yet come to take technology for granted but nonetheless were as we are today both

attracted to and repelled by its potential This volume registers the deep history of such ambivalence examining technology s influence on Enlightenment British literature as well as the impact of literature on conceptions of attitudes toward and implementations of technology Offering a counterbalance to the abundance of studies on literature and science in seventeenth and eighteenth century Britain this volume s focus encompasses approaches to literary history that help us understand technologies like the steam engine and the telegraph along with representations of technology in literature such as the political machine Contributors ultimately show how literature across genres provided important sites for Enlightenment readers to recognize themselves as chimeras hybrids of machine and organism and to explore the modern self as a creature of social reality as well as a creature of fiction
