**Spatial Justice** Andreas Philippopoulos-Mihalopoulos,2014-10-30

There can be no justice that is not spatial Against a recent tendency to despatialise law matter bodies and even space itself this book insists on spatialising them arguing that there can be neither law nor justice that are not articulated through and in space Spatial Justice presents a new theory and a radical application of the material connection between space in the geographical as well as sociological and philosophical sense and the law in the broadest sense that includes written and oral law but also embodied social and political norms More specifically it argues that spatial justice is the struggle of various bodies human natural non organic technological to occupy a certain space at a certain time Seen in this way spatial justice is the most radical offspring of the spatial turn since as this book demonstrates spatial justice can be found in the core of most contemporary legal and political issues issues such as geopolitical conflicts environmental issues animality colonisation droning the cyberspace and so on In order to agree this the book employs the lawscape as the tautology between law and space and the concept of atmosphere in its geological political aesthetic legal and biological dimension Written by a leading theorist in the area Spatial Justice Body Lawscape Atmosphere forges a new interdisciplinary understanding of space and law while offering a fresh approach to current geopolitical spatialegal and ecological issues

*Transgender Migrations* Trystan Cotten,2012-05-23

Transgender Migrations brings together a top notch collection of emerging and established scholars to examine the way that the term migration can be used not only to look at the way trans bodies migrate from one gender to the another but the way that trans people migrate in the larger geopolitical contexts of immigration reform the war on terror the war on drugs and the increased policing of national borders The book centers trans ing experiences identities and politics and treats these identities as inextricably intertwined with other social identities institutions and discourses of sexuality nationality race and ethnicity globalization colonialism and terrorism The chapter authors explore not only the movement of bodies in through and across spaces and borders but also chart the metamorphoses of these bodies in relation to migration and mobility Transgender Migrations takes the theory documented in The Transgender Studies Reader and blows it up to a global scale It is the logical next step for scholarship in this dynamic emerging field

This book provides for the first time a systematic and comprehensive narrative of the history of one central idea in economics namely the division of labour over the past two and a half millennia with special focus on that having occurred in the most recent two and a half centuries Quite contrary to the widely held belief the idea has a fascinating biography much richer than that exemplified by the pin making story that was popularized by Adam Smith s classical work published in 1776
