The CAHPS cut point analysis on the left shows measure level cut point movement from SY23 to SY24

Note: Part D measures utilize the MA-PD cut points and not the Part D only cut points

## Key Takeaways

- ▶ Despite large continuous focus and investment in member experience, **CAHPS** measures saw **stable or decreasing** cut point movement year over year
- ▶ CAHPS cut points for SY24 are **NOT** Tukey adjusted – Tukey does not apply to CAHPS measures
- ▶ Patient access, as indicated in the **Getting Needed Care** measure, showed **tremendous downward movement** in cut points across each Star level. This negative movement is likely **indicative of larger patient access issues** as members are seeking care and finding trouble with provider availability **post-COVID**
- ▶ With Member Experience, Complaints, and Access measures remaining at the 4x weight for MY23/SY25, plans need to continue to focus on performance improvement in this domain to help bolster overall rating
