Agents, Assumptions and Motivations Behind REDD+ Simone Lovera-Bilderbeek,2019 It was hoped that by paying forest dependent peoples and countries for their service of conserving their forests REDD would lead to a reduction in deforestation greenhouse gases The complexities have however left some ambiguities It was never agreed who would pay for the program and it has been criticized as ignoring the root causes of forest loss Considering the motivations of those who promoted REDD this book proposes remedies to its shortfalls and recommends more efficient equitable and effective conservation policies **Commercial and Financial Chronicle** ,1907 Patent Law Injunctions Rafal

Sikorski,2018-11-27 In numerous jurisdictions courts have realized that injunctive relief should not be available automatically in case of patent infringement Particularly in the wake of the US Supreme Court decision in eBay v MercExchange it has become clear that granting an injunction may in some cases enable abuse by patent holders in order to obtain royalties exceeding significantly the value of patent protected invention or that it may be manifestly against the public interest This book offers a comparative study of the approaches towards injunctive relief taken by a number of leading jurisdictions including the United States the European Union EU selected EU Member States Germany France The Netherlands Belgium the United Kingdom and Poland and China India Japan and South Korea Responding to the growing need to provide a

comprehensive and flexible framework for the application of injunctive relief twelve patent law experts both academics and well known practitioners familiar with practice in their particular jurisdictions offer analyses of such elements of patent law injunctions as the following access to standard essential patents operations of patent assertion entities trolls and patent privateers equitable nature of injunctive relief as a source of flexibility abuse of right and competition law defences to injunctive relief as sources of flexibility analysis of EU instruments that could be used in the interpretation of Member State implementing laws conditions for the application of tools such as equity competition law or general doctrines such as abuse of rights circumstances when injunctions should be denied to patentees even though a valid patent was infringed complex products cases where patents protect minor parts of the technologies and deficiencies and advantages of various approaches to injunctive relief A proposal for an optimal model of granting injunctions is also included Given that there is a growing consensus as to the circumstances when injunctions should be available to the patentees and the circumstances when injunctions should be denied a comprehensive analysis of the various legal doctrines that justify a more flexible approach towards injunctive relief is warranted This book will give patent law practitioners and in house counsel the opportunity to draw from the experience of other jurisdictions where courts faced similar problems Policymakers patent office officials academics and researchers in intellectual property law will also welcome this approach

The EU, the US and Global Climate Governance Christine Bakker, Francesco Francioni, 2016-02-17 This volume presents a critical analysis of transatlantic relations in the field of environmental governance and climate change The work focuses on understanding the possible trends in the evolution of global environmental governance and the prospects for breaking the current impasse on climate action Drawing on research involving experts from eleven different universities and institutes the authors provide innovative analyses on policy measures taken by the EU and the US the world's largest economic and commercial blocs in a number of fields ranging from general attitudes on environmental leadership with regard to climate change to energy policies new technologies for hydrocarbons extraction and carbon capture as well as the effects of extreme weather events on climate related political attitudes The book examines the way in which the current attitudes of the EU and the US with regard to climate change will affect international cooperation and the building of consensus on possible climate policies and looks to the future for international environmental governance arguably one of the most pressing concerns of civilisation today This book which is based on research carried out in the context of the EU financed FP7 research project TRANSWORLD will appeal to academics policy makers and practitioners seeking a deeper understanding of the challenges resulting from climate change
