Using Your Operator's Manual

This manual is an important part of your machine and should remain with the machine when you sell it.

Reading your operator's manual will help you and others avoid personal injury or damage to the machine. Information given in this manual will provide the operator with the safest and most effective use of the machine. Knowing how to operate the machine safely and correctly will allow you to train others who may operate the machine.

If you have an attachment, use the safety and operating information in the attachment operator's manual along with the machine operator's manual to operate the attachment safely and correctly.

This manual and safety signs on your machine may also be available in other languages (see your authorized dealer to order).

Sections in your operator's manual are placed in a specific order to help you understand all the safety messages and learn the controls so you can operate the machine safely. You can also use this manual to answer any specific operating or servicing questions. A convenient index located at the end of this book will help you to find needed information quickly.

The machine shown in this manual may differ slightly from your machine, but will be similar enough to help you understand our instructions.

RIGHT HAND and LEFT HAND sides are determined by facing in the direction the machine will travel when going forward. When you see a broken line (---), the text referred to is taken from view.

Before delivering the machine, your dealer performed a preliminary inspection to ensure best performance.

Machine Use

This machine is designed solely for use in customary agricultural use, for light and medium grade maintenance, and for winter work. Use in any other way is considered as contrary to the intended use.

The manufacturer accepts no liability for damage or injury resulting from this misuse, and these risks must be borne solely by the user. Compliance with and strict adherence to the conditions of operation, service and repair as specified by the manufacturer also constitute essential elements for the intended use.

This machine should be operated, serviced and repaired only by persons familiar with all its particular characteristics and acquainted with the relevant safety rules (accident prevention). The accident prevention regulations, all other generally recognized regulations on safety and occupational machines and the road traffic regulations must be observed at all times.

Setting fuel delivery beyond published factory specifications or otherwise overengineering will result in loss of warranty protection for this machine.

Any arbitrary modifications carried out on this machine will release the manufacturer of all liability for any resulting damage or injury.
