found that nothing had changed and soon was again the boy he once was but now driven to succeed if for no other reason than to prove to himself that he could do it Faced with a choice of majors he chose electronic engineering because it was thought to be the most difficult course of study Later sensing that something was wrong with him emotionally and deeming it psychological he embarked on a private journey hoping to unearth the root cause of his problems After reading several books on psychology he attempted self analysis The effects were devastating He became paranoid and began having thoughts of suicide Ultimately an unexpected event forced him to confront the truth and his childhood trauma was finally brought into the light of day
