At a recent meeting of the world's leading car manufacturers, the subject of safety was discussed. It was decided that the best way to improve car safety was to make the car's body more resistant to impact. This was done by using a new material called 'Kevlar'. This material is very strong and is used in many other products. It is also very light and does not rust. The car's body was made of Kevlar. This made the car much safer. It was also much lighter and faster. The car was called the 'Kevlar Car'.
