DeMarco, 2008 **Maple 13**, 2009 *Maple Eleven Introductory Programming Guide*, 2007 **Essential Maple 7** Robert M. Corless, 2002-03-28 This book provides an accelerated introduction to Maple for scientific programmers who already have experience in other computer languages such as C Pascal or FORTRAN It gives an overview of the most commonly used constructs and an elementary introduction to Maple programming The new edition is substantially updated throughout In particular there are new programming features especially modules nested lexical scopes documentation features and object oriented support a new solution of differential equations and new plotting features Review of Earlier Edition It is especially nice for people like us who have done some C and FORTRAN programming in our time but would like to take better advantage of a tool like Maple It discusses things of key importance to a scientific programmer and does not go on and on with things you d never use anyway The examples are terrific beyond description I have informed my colleagues here that this is a must have Brynjulf Owren Department of Mathematical Sciences The Norwegian Institute of Technology Essential Maple Robert M. Corless, 2013-03-09 What s in this book This book contains an accelerated introduction to Maple a computer algebra language It is intended for scientific programmers who have experience with other computer languages such as C FORTRAN or Pascal If you wish a longer and more leisurely introduction to Maple see 8 27 39 This book is also intended as a reference summary for people who use Maple infrequently enough so that they forget key commands Chapter 4 is a keyword summary This will be useful if you have forgotten the exact Maple command for what you want This chapter is best accessed through the table of contents since it is organized by subject matter The mathematical prerequisites are calculus linear algebra and some differential equations A course in numerical analysis will also help Any extra mathematics needed will be developed in the book This book was

prepared using Maple V Release 3 although most of the examples will work with at most only slight modification in Maple V Release 2 This book does not require any particular hardware The systems I have used in developing the book are machines running IBM DOS and WIN OS2 Unix machines in an ASCII terminal mode and x windows systems There should be no adjustments necessary for readers equipped with Macintoshes or other hardware Maple is an evolving system New features will be described in the documentation for updates updates in Maple *Mathematical Computing* David Betounes, Mylan Redfern, 2001-12-07 This book teaches introductory computer programming using Maple offering more mathematically oriented exercises and problems than those found in traditional programming courses while reinforcing and applying concepts and techniques of calculus Includes case studies **Maple Advanced Programming Guide** M.
