Exam 70-646 Windows Server 2008 Server Administrator covers these topics: Planning for Server Deployment, Planning for Server Management, Monitoring and Maintaining Servers, Planning Application and Data Provisioning, Planning for Business Continuity and High Availability. Exam 70-640 is all about Configuring Windows Server 2008 Active Directory. Topics include: Configuring Domain Name System (DNS) for Active Directory, Configuring the Active Directory infrastructure, Configuring Active Directory Roles and Services, Creating and maintaining Active Directory objects, Maintaining the Active Directory environment, Configuring Active Directory Certificate Services. We give you knowledge, information relevant to the exam specifications. To be able to succeed in the real exams, you'll need to apply your earned knowledge to the question scenarios. Many of the exam questions are written to be less straightforward. They tend to be framed within the context of short scenarios. The exams are not too difficult. However, coverage is very comprehensive. A wide range of topics are presented in the official topic list. The exams do not ask you to answer hundreds of questions. In other words, only a small fraction of the official topics will be presented. To succeed in the exams, you need to read as many reference books as possible. There is no single book that can cover everything. This Exam FOCUS book focuses on the more difficult topics that will likely make a difference in exam results. The book is NOT intended to guide you through every single official topic. You should therefore use this book together with other reference books for the best possible preparation outcome. **MCSA: Windows 10 Complete Study Guide** William Panek, 2017-01-25.
