

Enhances the navigation efficiency and safety by watching NAVTEX messages broadcasted on both international and local channels

FURUKA NX-700 is a dual-channel NAVTEX receiver for SOLAS ships complying with the new NAVTEX performance standard (MSC.148(77)) which is implemented on and after 1 July 2005.

The NX-700 can receive two channels simultaneously. One is set for 518 kHz to receive international NAVTEX messages and another is selectable from 490 or 4209.5 kHz for domestic or local NAVTEX messages. These messages include a variety of safety information such as Navigational Warnings, Meteorological Warnings, Search and Rescue (SAR) information and other information for ships sailing within the reach of each service station's coverage. The broadcast station can be selected automatically according to own ship position when the NX-700 is connected with a GPS navigator.

Every incoming message is stored in non-volatile memory and is displayed on the clear 5" silver bright LCD. Three different font sizes are available and one of them can be selected on menu.

The NX-700-A consists of a receiver, display with printer and antenna unit. The NX-700-B has a low profile, stylish display without a printer, receiver and antenna unit. The compact omnidirectional antenna requires no grounding because it is a loop antenna. In addition, the antenna incorporates a high-performance preamp within the compact body, which gives reliable and uninterrupted reception without an extra whip antenna.
