Nutritional Management of Renal Disease Joel D. Kopple, Shaul G. Massry, Kamyar Kalantar-Zadeh, 2012-12-31 This translational text offers in depth reviews of the metabolic and nutritional disorders that are prevalent in patients with renal disease. Chapter topics address the growing epidemic of obesity and metabolic syndrome. Each chapter integrates basic and clinical approaches from cell biology and genetics to diagnosis patient management and treatment. Chapters in sections 4-7 include new illustrative case reports and all chapters emphasize key concepts with chapter ending summaries. New features also include the latest National Kidney Foundation Clinical Practice Guidelines on Nutrition in Chronic Renal Failure the most recent scientific discoveries and the latest techniques for assessing nutritional status in renal disease and literature reviews on patients who receive continuous veno venous hemofiltration with or without dialysis. Provides a common language for nephrologists nutritionists endocrinologists and other interested physicians to discuss the underlying research and translation of best practices for the nutritional management and prevention of renal disease. Saves clinicians and researchers time in quickly accessing the very latest details on nutritional practice as opposed to searching through thousands of journal articles. Correct diagnosis and therefore correct treatment of renal metabolic and nutritional disorders depends on a strong understanding of the molecular basis for the disease. Both nephrologists and nutritionists will benefit. Nephrologists and nutritionists will gain insight into which treatments medications and diets to use based on the history progression and

genetic make up of a patient Case Reports will offer an added resource for fellows nutritionists and dieticians who need a refresher course
