Dog's Best Friend? John Sorenson, Atsuko Matsuoka, 2019-11-14 In almost 40 per cent of households in North America dogs are kept as companion animals. Dogs may be man's best friends but what are humans to dogs? If these animals' loyalty and unconditional love have won our hearts, why do we so often view closely related wild canids such as foxes, wolves, and coyotes as pests, predatory killers, and demons? Re-examining the complexity and contradictions of human attitudes towards these animals, *Dog's Best Friend* looks at how our relationships with canids have shaped and also been transformed by different political and economic contexts. Journeying from ancient Greek and Roman societies to Japan's Edo period to eighteenth century England, essays explore how dogs are welcomed as family, consumed in Asian food markets, and used in Western laboratories. Contributors provide glimpses of the lives of street dogs and humans in Bali, India, Taiwan, and Turkey, and illuminate historical and current interactions in Western societies. The book delves into the fantasies and fears that play out in stereotypes of coyotes and wolves, while also acknowledging that events such as the Wolf Howl in Canada's Algonquin Park indicate the emergence of new popular perspectives on canids. Questioning where canids belong, how they should be treated, and what rights they should have, *Dog's Best Friend* reconsiders the concept of justice and whether it can be extended beyond the limit of the human species.

Knowing New Biotechnologies Matthias Wienroth, Eugénia Rodrigues, 2015-02-20 The areas of personal genomics and citizen science draw on and bring together different cultures of producing and managing knowledge and meaning. They also cross local and global boundaries, are subjects and objects of transformation, and mobility of research practices, evaluation, and multi-stakeholder groups. Thirdly, they draw on logics of convergence, new links between and new kinds of stakeholders, spaces, knowledge, practices, challenges, and opportunities. This themed collection of essays from nationally and internationally leading scholars and commentators advances and widens current debates in Science and Technology Studies and in Science Policy concerning converging technologies by complementing the customary focus on technical aspirations for convergence with the analysis of the practices and logics of scientific, social, and cultural knowledge production that constitute contemporary technoscience. In case studies from across the globe, contributors discuss the ways in which science and social order are linked in areas such as direct-to-consumer genetic testing and do-it-yourself biotechnologies. Organised into thematic sections, *Knowing New Biotechnologies* explores ways of understanding the dynamics and logics of convergences in emergent biotechnologies, governance, and regulatory issues around technoscientific convergences, democratic aspects of converging technologies, lay involvement in scientific research, and the co-production of biotechnology and social and cultural knowledge.

Social Robots from a Human Perspective Jane Vincent, Sakari Taipale, Bartolomeo Sapio, Giuseppe Lugano, Leopoldina Fortunati, 2015-05-08 This book presents a comprehensive overview of the human dimension of social robots by discussing both transnational features and national peculiarities. Addressing several issues that explore the human side of social robots, this book investigates what a

social robot is and how we might come to think about social robots in the different areas of everyday life Organized around three sections that deal with Perceptions and Attitudes to Social Robots Human Interaction with Social Robots and Social Robots in Everyday Life it explores the idea that even if the challenges of robot technologies can be overcome from a technological perspective the question remains as to what kind of machine we want to have and use in our daily lives Lessons learned from previous widely adopted technologies such as smartphones indicate that robot technologies could potentially be absorbed into the everyday lives of humans in such a way that it is the human that determines the human machine interaction In a similar way to how today's information and communication technologies were initially designed for professional industrial use but were soon commercialized for the mass market and then personalized by humans in the course of daily practice the use of social robots is now facing the same revolution of domestication In the context of this transformation which involves the profound embedding of robots in everyday life the human aspect of social robots will play a major part This book sheds new light on this highly topical issue one of the central subjects that will be taught and studied at universities worldwide and that will be discussed widely publicly and repeatedly in the near future Bioart Kitchen Lindsay Kelley, 2016-03-07 What do new technologies taste like A growing number of contemporary artists are working with food live materials and scientific processes in order to explore and challenge the ways in which manipulation of biological materials informs our cooking and eating Bioart or biological art uses biotech methods to manipulate living systems from tissues to ecologies While most critiques of bioart emphasise the influences of new media digital media and genetics this book takes a bold alternative approach Bioart Kitchen explores a wide spectrum of seemingly unconnected subjects which when brought together offer a more inclusive expansive history of bioart namely home economics the feminist art of the 1970s tissue culture methodologies domestic computing and contemporary artistic engagements with biotechnology Introduction to Public Health eBook Elizabeth Parker, 2015-08-14 This third edition of Introduction to Public Health by Fleming and Parker continues to cement itself as a highly respected resource for public health students This title provides an up to date and comprehensive overview of the key concepts and principles of public health from a multidisciplinary perspective This highly anticipated new edition of Introduction to Public Health addresses topical issues including epidemiology ethics and evidence based practice Parker and Fleming also includes a new focus on infectious diseases and disease prevention The inclusion of the new chapter Public health and social policy will help broaden the readers understanding of the influence policy has on public health Evolve resources for students and instructors Student Quiz Evolve resources for instructors only PowerPoint slides Lesson and tutorial plans Image bank tables and figures from book New chapter Public health and social policy Focus on infectious diseases and disease prevention Acta Theriologica, 2014 **AIIMS Annual Report** All-India Institute of Medical Sciences, 2014 *Canadian Journal of Fisheries and Aquatic Sciences*, 2014-05 *Yearbook of International Organizations 2014-2015 (Volume 4)* Union Of International Associations, Union of International Associations, 2014-09-17 The
