Easy A Betty Kaklamanidou, 2018-04-24 *Easy A* 2010 is the last significant box office success in the high school teen movie subgenre and a film that has already been deemed a classic by many cultural commentators and popular film critics. By applying interdisciplinary insight to a relatively overlooked movie in academic discussion, *Easy A: The End of the High School Teen Comedy* is the first in-depth volume that places the movie within several key contexts and concepts of intertextuality, gender, genre, and adaptation, and social discourse. Through the unpacking of a complex narrative that draws its plot from Nathaniel Hawthorne's *The Scarlet Letter* 1850 and shares affinities with John Hughes paradigmatic films from the 1980s and key films from the 1990s, this volume presents *Easy A* as a palimpsest for the millennial generation. Clear and comprehensive, the book argues that *Easy A* marks the end of the commercially successful high school teen comedy and discusses the reasons through a comparative synchronic and semi-diachronic historical comparison of the film with contemporary cinematic texts and those of the 1980s and 1990s.

Profiles over 270 American colleges and universities offering facilities for learning disabled students. *The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design* Jon Lang, 2020-11-09. The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design is a fully illustrated descriptive and explanatory history of the development of urban design ideas and paradigms of the past 150 years. The ideas and projects, hypothetical and built, range in scale from the city to the urban block level. The focus is on where the generic ideas originated, the projects that were designed following their precepts, the functions they address and/or afford, and what we can learn from them. The morphology of a city, its built environment, evolves unselfconsciously as private and governmental investors self-consciously erect buildings and infrastructure in a pragmatic piecemeal manner to meet their own ends. Philosophers, novelists, architects, and social scientists have produced myriad ideas about the nature of the built environment that they consider to be superior to those forms resulting from a laissez-faire attitude to urban development. Rationalist theorists dream of ideal futures based on assumptions about what is good; empiricists draw inspirations from what they perceive to be working well in existing situations. Both groups have presented their advocacies in manifestoes and often in the form of generic solutions or illustrative designs. This book traces the history of these ideas and will become a standard reference for scholars and students interested in the history of urban spaces, including architects, planners, urban historians, urban geographers, and urban morphologists.
