Jftc Essay Competition 201:

Coherence between Data Protection and Competition Law in Digital Markets Klaudia Majcher, 2023-09-28 In digital markets data protection and competition law affect each other in diverse and intricate ways Their entanglement has triggered a global debate on how these two areas of law should interact to effectively address new harms and ensure that the digital economy flourishes Coherence between Data Protection and Competition Law in Digital Markets offers a blueprint for bridging the disconnect between data protection and competition law and ensuring a coherent approach towards their enforcement in digital markets Specifically this book focuses on the evolution of data protection and competition law their underlying rationale their key features and common objectives and provides a series of examples to demonstrate how the same empirical phenomena in digital markets pose a common challenge to protecting personal data and promoting market competitiveness A panoply of theoretical and empirical commonalities between these two fields of law as this volume shows are barely mirrored in the legal enforcement policy and institutional approaches in the EU and beyond where the silo approach continues to prevail The ideas that Majcher puts forward for a more synergetic integration of data protection and competition law are anchored in the concept of sectional coherence This new coherence centred paradigm reimagines the interpretation and enforcement of data protection and competition law as mutually cognizant and reciprocal allowing readers to explore in an innovative way the interface between these legal fields and identify positive interactions instead of merely addressing inconsistencies and tensions This book reflects on the conceptual practical institutional and constitutional implications of the transition towards coherence and the relevance of its findings for other jurisdictions [The Digital Economy and Competition Law in Asia](#) Steven Van Uytsel, 2021-05-06 The digital economy broadly defined as the economy operating on the basis of interconnectivity between people and businesses has gradually spread over the world Although a global phenomenon the digital economy plays out in local economic political and regulatory contexts The problems thus created by the digital economy may be approached differently depending on the context This edited collection brings together leading scholars based in Asia to detail how their respective jurisdictions respond to the competition law problems evolving out of the deployment of the digital economy This book is timely because it will show to what extent new competition law regimes or those with a history of lax enforcement can respond to these new developments in the economy Academics in law and business strategies with an interest in competition law both in Asia and more broadly will find the insights in this edited collection invaluable Further this volume will be a key resource for scholars practitioners and students
