**ECONOMIC THEORY AND ITS APPLICATION IN LIFE** Hastin Umi Anisah, Didit Herlianto, Sarlotha Yulliana Purimahua, Belianus Patria Latuheru, Elia Radianto, Paul Usmany, Jongkers Tampubolon, 2025-12-15 This book discusses economic theory and its applications in everyday life. It includes an introduction to economics, basic economic principles in everyday decision making, consumer and producer behavior in microeconomic theory, costs, production and efficiency in business activities, the role of fiscal and monetary policy and international trade and the global economy. This book still has many shortcomings in its composition. Therefore, we sincerely welcome criticism and suggestions for its improvement and refinement in the future.

**Power and Influence of Economists** Jens Maesse, Stephan Pühringer, Thierry Rossier, Pierre Benz, 2021-05-23 Economists occupy leading positions in many different sectors including central and private banks, multinational corporations, the state and the media, as well as serving as policy consultants on everything from health to the environment and security. *Power and Influence of Economists* explores the interconnected relationship between power, knowledge and influence, which has led economics to be both a source and beneficiary of widespread power and influence. The contributors to this book explore the complex and diverse methods and channels that economists have used to exert and expand their influence from different disciplinary and national perspectives. Four different analytical views on the role of power and economics are taken: first, the role of economic expert discourses as power devices for the formation of influential expertise; second, the logics and modalities of governmentality that produce power-knowledge apparatuses between science and society; third, economists as involved in networks between academia, politics and the media; and fourth, economics considered as a social field including questions of legitimacy and unequal relations between economists based on the detention of various capitals. The volume includes case studies on a variety of national configurations of economics, such as the US, Germany, Italy, Switzerland, Greece, Mexico and Brazil, as well as international spaces and organisations such as the IMF. This book provides innovative research perspectives for students and scholars of heterodox economics, cultural political economy, sociology of professions, network studies and the social studies of power, discourse and knowledge. **A Theory of Insurance and Gambling** John A. Nyman, 2024 This book holds that the demand for insurance is best understood not by focusing on risk preferences but by focusing on the additional income the states of the world that trigger the income transfer from the insurer and the value of income and consumption in those states. It is unlikely that demand can be understood if the analyst limits the gain from insurance to coverage of the uninsured loss alone. It is also unlikely that the demand can be understood if the analyst limits the analysis to a movement along a static risk-averse utility or value function rather than acknowledging that a

shift of this function and thus in the utility or value of additional income often coincides with the occurrence of the event that triggers the payout
