The Possibility of Metaphysics E. J. Lowe,1998-10-08 Jonathan Lowe argues that metaphysics should be restored to a central position in philosophy as the most fundamental form of rational inquiry whose findings underpin those of all other disciplines He portrays metaphysics as charting the possibilities of existence by identifying the categories of being and the relations of ontological dependency between entities of different categories He proceeds to set out a unified and original metaphysical system he defends a substance ontology according to which the existence of the world s one world in time depends upon the existence of persisting things which retain their identity over time and through processes of qualitative change And he contends that even necessary beings such as the abstract objects of mathematics depend ultimately for their existence upon there being a concrete world of enduring substances Within his system of metaphysics Lowe seeks to answer many of the deepest and most challenging questions in philosophy
