Memo 2014 23 September 2014 Geography Paper1:

Law and Regulation of Mobile Payment Systems Joy Malala, 2017-11-28 Over the last ten years mobile payment systems have revolutionised banking in some countries in Africa In Kenya the introduction of M Pesa a new financial services model has transformed the banking and financial services industry Giving the unbanked majority access to the financial services market it has attracted over 18 million subscribers which is remarkable given that fewer than 4 million people in Kenya have bank accounts This book addresses the legal and regulatory issues arising out of the introduction of M Pesa in Kenya and its drive towards financial inclusion It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools institutional arrangements and government decisional processes through the examination as a whole of its regulatory capacity This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya

The War Lawyers Craig Jones, 2020-11-26 Over the last 20 years the world's most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations spaces which had previously been exclusively for generals and commanders These professionals trained and hired to give legal advice on an array of military operations have become known as war lawyers The War Lawyers examines the laws of war as applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan and the Israel military in Gaza Drawing on interviews with military lawyers and others this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked whether by manned aircraft drones and or ground forces and with what results This book shows just how important law and military lawyers have become in the conduct of contemporary warfare and how it is understood Jones argues that circulations of law and policy between the US and Israel have bolstered targeting practices considered legally questionable contending that the involvement of war lawyers in targeting operations enables legitimises and sometimes even extends military violence

Ukraine Over the Edge Gordon M. Hahn, 2018-02-08 The Ukrainian crisis that dominated headlines in fall 2013 was decades in the making Two great schisms shaped events one within Ukraine its western and southeastern parts divided along cultural and political lines the other was driven by geopolitical factors Competition between Russia and the West exacerbated Ukraine's divisions This study focuses on the historical background and complex causality of the crisis from the rise of mass demonstrations on Kiev's Maidan Nezalezhnosti Independence Square to the making of the post revolt regime In the context of a new cold war the author sheds light on the role of radical Ukrainian nationalists and neofascists in the February 2014 snipers massacre the ouster of President Viktor Yanukovich and

Russia's seizure of Crimea and involvement in the civil war in the eastern region of Donbass

The Rise and Rise of

Illegal Ticket Touting Alessandro Moretti, 2023-02-10 This book presents an ethnographic study of contemporary ticket touts in the UK. Despite the recent interest in the topic of black market ticket sales, media coverage and parliamentary interventions over the last ten years have revealed a widespread lack of knowledge with regard to the phenomenon of touting and the players engaging in the practice. *The Rise and Rise of Illegal Ticket Touting* sheds light on the world of touting and delivers an authentic picture of the individuals involved of their methods, values and motivations for performing ticket touting as an organised entrepreneurial deviant activity. The touts' varied methods of buying and selling tickets, the hierarchical structures and strict ethos of their criminal organisations and their specific *modi operandi* for evading detection and arrest both on the streets and online are focal points of the study. Of equal importance are the touts' attitudes, perceptions and adaptations to or outright dismissal of society's legal and moral frameworks. This book illuminates why historic and renewed attempts to challenge ticket touting have been unsuccessful, focusing on inadequate legislation, a lack of enforcement and the widespread corruption and exploitable loopholes that exist within the official primary ticket market. An accessible and compelling read, *The Rise and Rise of Illegal Ticket Touting* will appeal to students and scholars of criminology, sociology, social policy, policing and all those with an interest in live music and sport and the hidden practices that lurk beneath the surface.

China and Its Small Neighbors

Sung Chull Kim, 2023-03-01 In *China and Its Small Neighbors*, Sung Chull Kim examines the political implications of the economic asymmetry between China and its small neighbors, part of wider changes in international relations brought about by the rise of China. While being critical of the current trend that focuses on the China-U.S. rivalry alone, Kim argues that a microanalysis of China's advances toward its neighbors is a guide to understanding the trajectory of China's expanding influence and transitions in world politics more broadly. Economic asymmetry as seen in trade concentration, non-transparency and reliance on bilateral aid has made China's small neighbors vulnerable on the political front, thus generating potential threats to their sovereignty and independence. Because China has the upper hand in the bilateral relationships, these weak states practice dual-core hedging as a strategy for survival. They hedge on China for expected economic benefits and at the same time hedge against their powerful neighbor to mitigate the risks involved in that hedging. On each small state's mode of hedging depends on its degree of vulnerability and its availability of policy instruments such as multilateral institutions and bilateral partnerships with extra-regional powers.

Migranthood

Lauren Heidbrink, 2020-04-28 *Migranthood* chronicles deportation from the perspectives of Indigenous youth who migrate unaccompanied from Guatemala to Mexico and the United States. In communities of origin in Guatemala, zones of transit in Mexico, detention centers for children in the U.S. government facilities, receiving returned children in Guatemala and communities of return, young people share how they negotiate everyday violence and discrimination, how they and their families prioritize limited resources and make difficult decisions, and how they develop and sustain relationships over time.

and space Anthropologist Lauren Heidbrink shows that Indigenous youth cast as objects of policy not participants are not passive recipients of securitization policies and development interventions Instead Indigenous youth draw from a rich social cultural and political repertoire of assets and tactics to navigate precarity and marginality in Guatemala including transnational kin social networks and financial institutions By attending to young people s perspectives we learn the critical roles they play as contributors to household economies local social practices and global processes The insights and experiences of young people uncover the transnational effects of securitized responses to migration management and development on individuals and families across space citizenship status and generation They likewise provide evidence to inform child protection and human rights locally and internationally **Military Review** ,2018 **Industrial**

Development Report United Nations Publications,2016-01-14 This report looks at how technology and innovation achieves inclusive and sustainable industrial development ISID Its main finding is that ISID is feasible and technology can simultaneously serve all three dimensions of sustainability including economic social and environmental Rapid inclusive and sustainable industrialization can happen more frequently provided that policymakers firmly steer the industrialization process with opportune policies and avoid past mistakes In some cases the spread of technology has not materialized in concrete growth opportunities because of the lack of technological capabilities Innovation needs to be supported by interventions strengthening the process from invention to adoption as capabilities are developed and high tech manufacturing sectors are created seeing higher rates of sustainable growth **The Library Catalogs of the Hoover**
