Environmental and Natural Resource Economics Jonathan M. Harris, Brian Roach, 2017-06-26 Environmental issues are of fundamental importance and a broad approach to understanding the relationship of the human economy and the natural world is essential In a rapidly changing policy and scientific context this new edition of Environmental and Natural Resource Economics reflects an updated perspective on modern environmental topics Now in its fourth edition this book includes new material on climate change the cost competitiveness of renewable energy global environmental trends and sustainable economies The text provides a balanced treatment of both standard environmental economics and ecological economics based on the belief that these two approaches are complementary Several chapters focus on the core concepts of environmental economics including the theory of externalities the management of public goods the allocation of resources across time environmental valuation and cost benefit analysis Material on ecological economics includes such topics as macroeconomic scale entropy and green national accounting Topical chapters focus on energy climate change water resources international trade forests fisheries and agriculture with an emphasis on designing effective policies to promote sustainability and a green economy Harris and Roach s premise is that a pluralistic approach is essential to understand the complex nexus between the economy and the environment This perspective combined with its emphasis on real world policies is particularly appealing to both instructors and students This is the ideal text for classes on environmental natural resource and ecological economics The book s companion website is available at http://www.bu.edu/eci/education/materials/textbooks/environmental_and_natural_resource_economics

The Economics of Chocolate Mara P. Squicciarini, Johan Swinnen, 2016-01-21 This book written by

global experts provides a comprehensive and topical analysis on the economics of chocolate While the main approach is economic analysis there are important contributions from other disciplines including psychology history government nutrition and geography The chapters are organized around several themes including the history of cocoa and chocolate from cocoa drinks in the Maya empire to the growing sales of Belgian chocolates in China how governments have used cocoa and chocolate as a source of tax revenue and have regulated chocolate and defined it by law to protect consumers health from fraud and industries from competition how the poor cocoa producers in developing countries are linked through trade and multinational companies with rich consumers in industrialized countries and how the rise of consumption in emerging markets China India and Africa is causing a major boom in global demand and prices and a potential shortage of the world s chocolate

Green Jobs for Sustainable Development Ana-Maria Boromisa, Sanja Tišma, Anastasya Ležaić, 2015-06-26 A green economy must be built on green jobs the kind of employment that is low carbon intended to reduce energy use and expected to restore environmental quality But attempts to define exactly what a green job is have led to varied and often contradictory answers There are many unresolved questions including whether we consider jobs in the nuclear fuel industry to be green jobs Or is a worker at a glass making company which supplies the glass for the solar photovoltaic industry doing a green job given that glass making is a dirty industry This book deals with the relationship between green concepts green jobs green economy green growth and sustainable development It examines to which extent creation of green jobs supports overall economic development as opposed to creation of elitist jobs and greenwashing In order to do so general conceptual frameworks for green jobs green economy green growth and green policy are presented as well as their implementation in ten countries selected among the Group of Twenty The selection includes advanced the European Union the United States of America Australia Canada Republic of Korea Japan and developing countries Mexico China Turkey and Brazil The analysis presented in this book shows that although green concept is well intentioned its implementation depends on local circumstances economic political and social Developed countries perceive green growth as a way to create new markets and demand while developing countries rely more on labor intensive growth and less expensive green jobs Thus greening the economy does not diminish differences between rich and poor This book is suitable for those who study and work in Ecological Economics Sustainable Development and Labor Economics

European Union Competition Law in the Airline Industry John Milligan, 2017-04-15 Since the liberalisation of air transport in the EU in the late 1980s with the application of competition law to agreements and practices within the EU and between EU and non EU airlines since 2004 competition has intensified and the industry has evolved with the emergence of low cost carriers greater consolidation between full service carriers through mergers and alliances and

most recently convergence of business models as airlines respond to competitive pressures The enforcement of competition law has also increased within the EU at EU and EU member state level and internationally This practical and thoroughly researched book minimising the need for cross referencing is the only current comprehensive study of European competition law from the perspective of the airline industry Among the issues and topics covered are the following commercial agreements between airlines such as code sharing mergers and alliances and other joint ventures means of distribution such as computer reservation or global distribution systems and travel agents supply and distribution agreements abusive conduct by dominant companies including airports airlines or other companies cartels including the Airfreight cartel case information exchange between competitors procedure enforcement and private actions for damages state aid to airlines by Governments through agreements between regional airports and low cost carriers and aid to airports and subsidies by non EU countries to airlines The author also gives an overview of the liberalisation process the European Common Aviation Area agreements with non EU countries latest developments including Brexit and ongoing trends As a practical guide to the application of competition law in relation to drafting commercial agreements planning and structuring mergers and alliances assessing existing agreements or handling claims or disputes among airlines or airports legal practitioners in the transport field will find this book to be of inestimable value as will business persons at airlines and airports For regulators academics and university libraries this book will also prove itself indispensable

Asian Development Outlook 2015 ,2015

Arab Middle Class ,2014 The present report studies the Arab middle class an important social group that is relatively little understood despite the fundamental role it has played in shaping the economic

and social development outcomes in the Arab region This report contributes to the ongoing debate about factors that led to the Arab uprisings and the difficult transitions to democracy that followed the departure of long standing dictators by marking elements influencing middle class allegiances specifically those that weakened their well established alliances with ruling regimes The report is motivated by the conviction on the basis of past development experiences that a new Arab development model can only succeed if the middle class plays a lead role in designing and implementing processes of economic transformation and political transition Studying the middle class is therefore crucial to interpreting the past understanding the present and reading the potential future development prospects of the Arab region This report introduces three novel approaches aimed at charting a path for sustaining empowering and enlarging the middle class The first is related to the measurement of the middle class based on a definition that takes into account both the quantity and quality of their consumption expenditure The second relates to the profiling of the Arab middle class using variables such as education employment and mobility in addition to multidimensional poverty The third novel approach lies in using these results to provide a narrative of the socioeconomic context of the decade leading up to the uprisings from a middle class perspective The report concludes that the empowerment of the Arab middle class could pave a way out of the current development and governance debacle towards an Arab developmental State Publisher s description Public Administration in English-speaking West Africa Edward Seth Asiedu,1977 **Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971** New York Public Library.
