Educational Reconstruction Gary McCulloch, 2013-09-05 This book presents a clear overview of the debates that surrounded the making of the 1944 Act which affected every aspect of education in this country It gives a detailed account of the tripartite divisions into three types of child that were sanctioned in the reforms of the 1940s At the same time it also emphasises the idea of education as a civic project which underlay the reforms and which was such an important part of their lasting authority The education policies of the past decade and the current attempts to shape a new education settlement need to be interpreted in a long term historical framework and in particular in relation to the aims and problems of the last great cycle of reform in the 1940s This book makes an important contribution to the development of such a framework and the social history of education policy in this country **The Bihar & Orissa Gazette** ,1916 **Antarctica** David

Day, 2013-05-03 Since the first sailing ships spied the Antarctic coastline in 1820 the frozen continent has captured the world's imagination David Day's brilliant biography of Antarctica describes in fascinating detail every aspect of this vast land's history two centuries of exploration scientific investigation and contentious geopolitics Drawing from archives from around the world Day provides a sweeping large scale history of Antarctica Focusing on the dynamic personalities drawn to this unconquered land the book offers an engaging collective biography of explorers and scientists battling the elements in the most hostile place on earth We see intrepid sea captains picking their way past icebergs and pushing to the edge of the shifting pack ice sanguinary sealers and whalers drawn south to exploit the Penguin El Dorado famed nineteenth century explorers like Scott and Amundson in their highly publicized race to the South Pole and aviators like Clarence Ellsworth and Richard Byrd flying over great stretches of undiscovered land Yet Antarctica is also the story of nations seeking to incorporate the Antarctic into their national narratives and to claim its frozen wastes as their own As Day shows in a place as remote as Antarctica claiming land was not just about seeing a place for the first time or raising a flag over it it was about mapping and naming and more generally knowing its geographic and natural features And ultimately after a little known decision by FDR to colonize Antarctica claiming territory meant establishing full time bases on the White Continent The end of the Second World War would see one last scramble for polar territory but the onset of the International Geophysical Year in 1957 would launch a cooperative effort to establish scientific bases across the continent And with the Antarctic Treaty science was in the ascendant and cooperation rather than competition was the new watchword on the ice Tracing history from the first sighting of land up to the present day Antarctica is a fascinating exploration of this deeply alluring land and man's struggle to claim it Parliamentary Papers Great Britain. Placing the Border in Everyday Life Reece Jones, Corey Johnson, 2016-04-22 Bordering no longer happens only at the borderline separating two sovereign states but rather through a wide range of practices and decisions that occur in multiple

locations within and beyond the state's territory. Nevertheless, it is too simplistic to suggest that borders are everywhere since this view fails to acknowledge that particular sites are significant nodes where border work is done. Similarly, border work is more likely to be done by particular people than others. This book investigates the diffusion of bordering narratives and practices by asking who borders and how. *Placing the Border in Everyday Life* complicates the connection between borders and sovereign states by identifying the individuals and organizations that engage in border work at a range of scales and places. This edited volume includes contributions from major international scholars in the field of border studies and allied disciplines who analyze where and why border work is done. By combining a new theorization of border work beyond the state with rich empirical case studies, this book makes a ground-breaking contribution to the study of borders and the state in the era of globalization.
