## **Memorandum Geography Grade 1september 2013:**

*A Global Idea* Mayssoun Sukarieh,2023-08-15 *A Global Idea* outlines how youth as shown by the Arab Spring uprisings and subsequent state responses became a prominent social and political category during the first two decades of the twenty first century in the Middle East Drawing on ethnographic fieldwork interview data and textual analysis Mayssoun Sukarieh explains that the spread of youth as an important category is linked to the operation of a global youth development complex a diverse transnational network of state private sector civil society and international development aid organizations that worked through key urban areas such as Washington DC Amman and Dubai In its analysis of the arrival extension and embedding of the youth development complex in the Middle East during this period *A Global Idea* addresses a broader question that is of global and not just regional concern How are certain ideas that are central to the working and reproduction of global capitalism able to travel the world so that they are found virtually everywhere

**The Meritocracy Trap** Daniel Markovits,2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

**Waste of a Nation** Assa Doron,Robin Jeffrey,2018-03-26 Assa Doron and Robin Jeffrey argue that in India the removal and reuse of waste lays waste to human lives People at the bottom are injured and stigmatized as they work with sewage toxic chemicals and rotting garbage If India is to emerge as a model for the world its policies will have to reach beyond the environment to encompass empathy

**New Labor in New York** Ruth Milkman,Edward Ott,2014-03-07 New York City boasts a higher rate of unionization than any other major U S city

roughly double the national average but the city's unions have suffered steady and relentless decline especially in the private sector. With higher levels of income inequality than any other large city in the nation, New York today is home to a large and growing precariat: workers with little or no employment security who are often excluded from the basic legal protections that unions struggled for and won in the twentieth century. Community-based organizations and worker centers have developed the most promising approach to organizing the new precariat and to addressing the crisis facing the labor movement. Home to some of the nation's very first worker centers, New York City today has the single largest concentration of these organizations in the United States; yet until now no one has documented their efforts. *New Labor in New York* includes thirteen fine-grained case studies of recent campaigns by worker centers and unions, each of which is based on original research and participant observation. Some of the campaigns documented here involve taxi drivers, street vendors, and domestic workers, as well as middle-strata freelancers, all of whom are excluded from basic employment laws. Other cases focus on supermarket, retail, and restaurant workers who are nominally covered by such laws but who often experience wage theft and other legal violations. Still other campaigns are not restricted to a single occupation or industry. This book offers a richly detailed portrait of the new labor movement in New York City, as well as several recent efforts to expand that

movement from the local to the national scale. **Towards a Political Economy of Resource-dependent Regions** Greg Halseth, Laura Ryser, 2017-08-18 This book advances our understanding of resource-dependent regions in developed economies in the 21st Century. It explores how rural and small-town places are working to find success in a new economy marked by demographic, economic, social, cultural, political, and environmental change. How are we to understand the changes and transformations working through communities and economies? Where are the trajectories of change leading these resource-dependent places and regions? Drawing upon examples from Canada, USA, UK, Australia, New Zealand, and the Nordic countries, these and other questions are explored and addressed by constructing a critical political economy framework of resource hinterland transition. *Towards a Political Economy of Resource-Dependent Regions* is a key resource for students and researchers in geography, rural and industrial sociology, economics, environmental studies, political science, regional studies, and planning, as well as policy makers, those in industry, and the private sector, and local and regional development practitioners.

**Green Criminology** Rob White, Diane Heckenberg, 2014-02-03 Over the past ten years, the study of environmental harm and crimes against nature has become an increasingly popular area of research amongst criminologists. This book represents the first international, comprehensive, and introductory text for green criminology, offering a concise exposition of theory and concepts and providing extensive geographical coverage, diversity, and depth to the many issues pertaining to environmental harm and crime. Divided into three sections, the book draws on a range of international case studies and examples and looks at the conceptual and methodological foundations of green criminology before examining in detail areas of environmental crime and harm and how they are addressed, including climate change and social conflict, abuse

and harm to animals threats to bio diversity pollution and toxic waste environmental victims environmental regulation law enforcement and courts environmental forensic studies environmental crime prevention Green Criminology is packed with pedagogical features including dialogue boxes case examples discussion questions and lists of further reading and is perfect for students around the world engaged with green criminology and crime against the environment      **South African national bibliography** ,1999 Classified list with author and title index      *Current Law Index* ,2000      **Paperbound Books in Print** ,1992      **The Times Index** ,2013-04 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Time educational supplement Scotland and the Times higher education supplement      **Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971** New York Public Library.
