Rethinking the Case Study in International Business and Management Research Rebecca Marschan-Piekkari, Catherine Welch, 2011-01-01 This important and original book places the case study in international business research in its historical context critically evaluates current case study practices in the field and proposes a more pluralistic future for case research within international business and international management research While the case study is the most popular qualitative research strategy in the field only a narrow selection of possible approaches is currently used IB and IM researchers typically rely on a case study approach that could be characterized as qualitative positivism The editors and contributors look beyond this disciplinary convention and encourage greater pluralism in IB and IM case research Their key argument is that increased awareness of prevailing disciplinary conventions and their limitations increases the potential for methodological innovation and versatility in case research The contributions provide critical novel and innovative perspectives on the case study in IB and IM research The book offers inspiration to case authors and an authoritative methodological reference for those publishing and reviewing case research It will also be highly regarded by postgraduate and doctoral students in IB and IM as well as both qualitative and quantitative researchers in the field

The Oxford Handbook of International Business Strategy Kamel Mellahi, Klaus Meyer, Rajneesh Narula, Irina Surdu, Alain Verbeke, 2021-01-07 The growth of the multinational enterprise MNE has led to an increasing interest in international business strategy from scholars professionals and policy makers alike MNEs must contend with challenges in both their home and host international markets and increasingly uncertain conditions in the international business environment demand superior firm level capabilities for multinational firms to achieve and maintain competitive advantages in the long run This Handbook explores the progress made in international business strategy theory and practice in the last few decades Written by an international team of leading experts it captures the differences in motivations and decision making processes between smaller and larger firms private family and state

owned firms and emerging or developed market multinationals It elaborates on the links between international strategy and the social responsibilities of the firm in its various host market contexts including the deployment of effective and ethical human resource practices in international markets Most importantly it lays out how the classic principles of international competitive strategy are transformed in today's markets in great part due to digitalization and provides suggestions on how MNEs can develop international business strategies to respond to these transformations The implications of these discussions for strategy and practice are becoming ever more profound This Handbook will prove a valuable resource for both international business scholars and practitioners

International Business Research Moshe Banai, Abraham Stefanidis, Jean J. Boddewyn, 2024-02-01 Drawing on contributions from nine prominent scholars the book reflects on global aspects of research in work employment leadership management and business It follows current trends in global business research and recommends directions for closing the gaps between theory and practice for the benefit of executives in multinational corporations academics and international transients Work and employment remain important and a core part of life giving not only a sense of purpose routine and meaning but also independence and the ability to connect and contribute to the lives of others and society Leadership styles and management behaviors in earlier multi country studies did not demonstrate significant associative patterns regarding interpersonal leadership in different countries and the use of mainstream single country leadership meta categories was invalidated Thus future studies of leadership should focus on investigating interpersonal leadership across national borders in combination with contemporary trends such as distance leadership global virtual teams and intersectionality As more and

more people seek employment across borders various types of sojourners specifically millions of low status international workers with some few exceptions have largely been ignored by scholars who study international mobility This failure adds to the research practice gap between scholars who investigate and the practitioners who manage sojourners of all status levels This book will appeal to scholars in leadership management international business cultural studies and to practicing managers The chapters in this book were originally published in International Studies of Management Organization
