**Biplanes at War** Wray R. Johnson, 2019-04-16 Unlike the relative uniformity of conventional warfare the peculiarities of small wars prevent a clear definition of rules and roles for military forces to follow During the small wars era aviation was still in its infancy and the US military had only recently begun battling in the skies The US Marine Corps recognized that flexibility and ingenuity would be critical to the successful conduct of small wars and thus employed the new technology of aviation In *Biplanes at War* US Marine Corps Aviation in the Small Wars Era 1915-1934 author Wray R Johnson provides a riveting history of the marines use of aviation between the world wars a time in which young soldiers were volunteering to fly in combat when flying itself was a dangerous feat Starting with Haiti in 1915 *Biplanes at War* follows the marines aviation experiences in Haiti the Dominican Republic China and Nicaragua chronicling how marines used aircraft to provide supporting fires e.g. dive bombing to ground troops in close contact with irregular opponents evacuate the sick and wounded transport people and cargo e.g. to assist humanitarian operations and even support elections in furtherance of democracy After years of expanding the capabilities of airplanes far beyond what was deemed possible the small wars era ended and the US Marines Corps transitioned into an amphibious assault force The legacy of the marines ability to adapt and innovate during the small wars era endures and provides a useful case study *Biplanes at War* sheds light on how the marines pioneered roles and missions that have become commonplace for air forces today an accomplishment that has largely gone unrecognized in mainstream histories of aviation and air power

**Shoot on Sight** Frederick Gooch, 2011-06-14 Rick Gooch's debut nonfiction book has exposed the illegal wildlife trade for what it is total greed corruption mismanagement and lack of education at all levels of global society at the expense of making animals that we supposedly adore and love potentially extinct The trade is the third largest criminal money maker after Drugs and Arms trafficking making it a multi billion yearly industry It highlights big business government corruption and inept enforcement involved in the illegal operations in Africa and Asia The book records factual information that digs deep into the ongoing slaughter where many animals are killed for their ivory some for their meat and skins and other parts that end up in Asian medication myths It focuses on the captive trade where there are more tigers living in the USA than there is in the wild worldwide It also gives possible solutions to many issues that need to be confronted so that the targeted animals can be given a sporting chance of survival

*The AOPA Pilot*, 2009 District Development Plan, 1997-2001: Marsabit, 1997 **Conserving Wildlife in African Landscapes** Nicholas Georgiadis, 2011 During the last two decades conservation strategies in Africa have changed from an almost exclusive focus on large mammals in protected areas to an emphasis on conserving ecological processes at the level of entire landscapes and on the role of human communities The papers assembled in this volume address diverse aspects of conserving the Ewaso landscape in northern Kenya where concerted and prodigious efforts to conserve wildlife and natural resources have achieved substantial progress Topics range from interpreting evidence for continuity and change in patterns of human settlement in the region to describing ecological interactions between wildlife people and livestock that are harmful or helpful from the challenges of adapting livestock management in the presence of predators to legal mechanisms for conserving wildlife habitat on private land In the final chapter results of a strategic planning exercise are described for conserving essential elements in the entire landscape the first of its kind in Kenya Today national policy and political will are still insufficiently aligned with this landscape conservation imperative to effect the changes that are necessary to conserve Kenya's biodiversity We hope this volume will help propagate awareness about the importance and threatened status of Kenya's ecosystems and promote confidence that a policy can be crafted that will reverse their decline
