# Laboratory Experiments in microbiology

A close-up photograph of a petri dish containing a yellow agar medium. The surface of the agar is covered with numerous small, red, circular bacterial colonies. On the right side of the dish, there are several distinct, elongated streaks of red bacterial growth, likely from a streak plate technique. The petri dish is held by a gloved hand, with a blue surgical glove visible on the left and a white glove on the right. The background is blurred, showing more of the gloved hands and the petri dish.
